### Statement of Authority

This document is the official published baggage policy of SkyHorizon Airways and is issued under the authority of the Vice President, Customer Experience. It applies to all passengers travelling on SkyHorizon-operated flights (flight numbers SH 100–SH 6999) and, where stated, to codeshare and interline itineraries involving SkyHorizon as a ticketing or operating carrier.

This policy is binding on SkyHorizon ground staff, cabin crew, and contracted ground handling agents at all stations. Where a discrepancy exists between this document and the SkyHorizon Dangerous Goods Acceptance Manual (SH-DG-001), the Dangerous Goods Acceptance Manual takes precedence for matters of dangerous goods classification and acceptance.

## **1. Introduction**

### **1.1 Purpose of this Baggage Policy**

This document sets out the official baggage policy of SkyHorizon Airways, covering cabin baggage, checked baggage, special baggage, dangerous goods, liquid restrictions, electronic devices, and pet travel across the SkyHorizon network. It is published to give passengers a single, authoritative reference for what they may bring on a SkyHorizon flight, how much it will cost if it exceeds the free allowance, and what to do if baggage is lost, delayed, or damaged.

This policy applies to all passengers travelling on flights operated by SkyHorizon Airways (IATA designator **SH**), regardless of where the ticket was purchased. Where a journey includes a segment operated by a codeshare or interline partner, the baggage policy of the operating carrier for that segment may apply instead; passengers are advised to check the baggage allowance shown on their e-ticket for each flight segment.

### **1.2 Passenger Responsibilities**

Passengers are responsible for:

- Ensuring their baggage complies with the weight, dimension, and piece limits set out in this policy before arriving at the airport.
- Declaring any item that may be classified as dangerous goods, special baggage, or restricted under Sections 4 and 5 of this policy, at the time of booking or check-in where required.
- Ensuring checked baggage is securely packed, locked (where applicable), and labelled with the passenger's name and contact details, in addition to the airline-issued baggage tag.
- Arriving at the airport with sufficient time to complete bag drop or check-in before the applicable counter closure time (see SH-OPS-MAN-001, Section 5).

- Reviewing and complying with the import, export, and customs regulations of the departure, transit, and destination countries in respect of items carried in baggage.
- Promptly reporting any baggage irregularity (delay, damage, or loss) to SkyHorizon staff before leaving the airport baggage hall, wherever possible.

### 1.3 Airline Responsibilities

SkyHorizon Airways is responsible for:

- Publishing and applying a clear, consistent baggage policy across all sales channels (website, mobile app, contact centre, and airport ticket offices).
- Handling checked baggage with reasonable care from check-in to baggage claim, including secure loading, transfer at connecting points, and timely unloading.
- Providing accurate baggage allowance information at the time of booking and reflecting any pre-purchased extra baggage on the passenger's reservation.
- Investigating and responding to baggage irregularity reports within the timelines set out in Section 9 of this policy.
- Compensating passengers for lost, delayed, or damaged baggage in accordance with the liability framework described in Section 9.3, regardless of fare type purchased.
- Maintaining trained staff at check-in, bag drop, and baggage services counters capable of advising passengers on special baggage and dangerous goods requirements.

### 1.4 Definitions

| Term                   | Definition                                                                                                                                                      |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Cabin Baggage          | Baggage carried into the aircraft cabin by the passenger and stowed in the overhead bin or under the seat in front.                                             |
| Checked Baggage        | Baggage accepted by the airline at check-in or bag drop, tagged, and carried in the aircraft hold.                                                              |
| Piece Concept          | A baggage allowance system that limits the number of pieces a passenger may check, with a maximum weight per piece, rather than a single combined weight limit. |
| Weight Concept         | A baggage allowance system that limits the combined weight of all checked baggage, irrespective of the number of pieces, up to a maximum per-piece weight.      |
| Free Baggage Allowance | The baggage a passenger may carry at no additional charge, determined by cabin class and route.                                                                 |
| Excess Baggage         | Baggage carried beyond the free baggage allowance, whether by piece count or weight, subject to additional charges.                                             |

| Term                               | Definition                                                                                                                                                                             |
|------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Oversized Baggage                  | A piece of baggage whose combined linear dimensions (length + width + height) exceed 158 cm (62 in).                                                                                   |
| Overweight Baggage                 | A piece of baggage whose weight exceeds the maximum allowed for its fare and class, up to the maximum single-piece weight SkyHorizon will accept for manual handling.                  |
| Special Baggage                    | Baggage requiring particular handling due to its size, shape, or fragility, such as sports equipment or musical instruments.                                                           |
| Dangerous Goods                    | Articles or substances capable of posing a risk to health, safety, property, or the aircraft, subject to specific carriage restrictions under international air transport regulations. |
| PIR (Property Irregularity Report) | The report filed with the airline when checked baggage is delayed, damaged, or lost.                                                                                                   |
| STEB (Security Tamper-Evident Bag) | A sealed bag used for duty-free liquids purchased after security screening, allowing carriage past the standard cabin liquid restriction.                                              |

\newpage

## 2. Cabin Baggage Policy

### 2.1 General Cabin Baggage Rules

Across all cabin classes, SkyHorizon applies a single maximum dimension for the main cabin bag, to ensure it fits within the overhead bin of every aircraft type in the fleet (see SH-OPS-MAN-001, Section 1.7). What varies by class is the **number** of cabin bags permitted and the **maximum weight** of each.

- Maximum cabin bag dimensions (all classes): **55 cm x 40 cm x 20 cm** (combined linear dimension 115 cm), including any handles, wheels, or side pockets.
- All cabin baggage must fit within the dimension gauge displayed at check-in and bag drop counters; any bag that does not fit, or that exceeds the weight limit for the passenger's cabin class, must be checked into the hold, subject to applicable excess baggage charges.
- Cabin baggage must be stowed before take-off and landing and during any period when the seatbelt sign is illuminated, in the overhead bin or fully under the seat in front.
- SkyHorizon reserves the right to gate-check cabin baggage into the hold, free of charge, on flights where overhead bin space is insufficient, prioritizing bags from the rear boarding groups first.

2.2 Economy Class

| Feature              | Allowance                                                        |
|----------------------|------------------------------------------------------------------|
| Number of Cabin Bags | 1                                                                |
| Maximum Weight       | 7 kg                                                             |
| Maximum Dimensions   | 55 x 40 x 20 cm                                                  |
| Personal Item        | 1, in addition to the cabin bag (see Section 2.6)                |
| Laptop Bag           | Permitted as the personal item, or inside the cabin bag          |
| Handbag              | Permitted as the personal item                                   |
| Duty-Free Bag        | Permitted as an additional item if STEB-sealed (see Section 2.7) |

2.3 Premium Economy Class

| Feature              | Allowance                                               |
|----------------------|---------------------------------------------------------|
| Number of Cabin Bags | 1                                                       |
| Maximum Weight       | 10 kg                                                   |
| Maximum Dimensions   | 55 x 40 x 20 cm                                         |
| Personal Item        | 1, in addition to the cabin bag                         |
| Laptop Bag           | Permitted as the personal item, or inside the cabin bag |
| Handbag              | Permitted as the personal item                          |
| Duty-Free Bag        | Permitted as an additional item if STEB-sealed          |

2.4 Business Class

| Feature              | Allowance       |
|----------------------|-----------------|
| Number of Cabin Bags | 1               |
| Maximum Weight       | 10 kg           |
| Maximum Dimensions   | 55 x 40 x 20 cm |

| Feature       | Allowance                                                                                                                 |
|---------------|---------------------------------------------------------------------------------------------------------------------------|
| Personal Item | 1, in addition to the cabin bag                                                                                           |
| Laptop Bag    | Permitted as the personal item, or carried separately as a third item where overhead bin space allows, at crew discretion |
| Handbag       | Permitted as the personal item                                                                                            |
| Duty-Free Bag | Permitted as an additional item if STEB-sealed                                                                            |

## 2.5 First Class

| Feature              | Allowance                                                     |
|----------------------|---------------------------------------------------------------|
| Number of Cabin Bags | 2                                                             |
| Maximum Weight       | 10 kg each                                                    |
| Maximum Dimensions   | 55 x 40 x 20 cm each                                          |
| Personal Item        | 1, in addition to the 2 cabin bags                            |
| Laptop Bag           | Permitted as the personal item, or as one of the 2 cabin bags |
| Handbag              | Permitted as the personal item                                |
| Duty-Free Bag        | Permitted as an additional item if STEB-sealed                |

## 2.6 Personal Items, Laptop Bags, and Handbags

In addition to the main cabin bag, every passenger in every class may carry one **personal item**, intended for small essentials that the passenger wishes to keep close at hand during the flight.

- Maximum personal item dimensions: **40 cm x 30 cm x 15 cm**.
- The personal item must fit fully under the seat in front; it does not occupy overhead bin space.
- A laptop bag, briefcase, handbag, or small backpack may serve as the personal item, provided it meets the dimension and weight limits above.
- A passenger may not carry a laptop bag, briefcase, and handbag as three separate items; these are collectively treated as a single personal item, and any additional item beyond the cabin bag and personal item must be checked into the hold, subject to excess baggage charges, unless it qualifies as an exempt item under Section 2.7 (duty-free) or Section 4 (special baggage, where free of charge under that section's specific terms).

2.7 Duty-Free Shopping Bags

Goods purchased at an airport duty-free outlet after security screening, or purchased onboard through the SkyHorizon SkyShop catalogue, may be carried as an additional item beyond the standard cabin baggage and personal item allowance, subject to the following:

- Liquid duty-free purchases must remain in the original **Security Tamper-Evident Bag (STEB)** with the purchase receipt visible, in accordance with Section 6.6 of this policy.
- Non-liquid duty-free items (confectionery, electronics, cosmetics in solid form, etc.) are not subject to the STEB requirement but must still fit within the available cabin stowage space.
- SkyHorizon reserves the right to request that a duty-free bag be combined with other cabin items or checked into the hold (where it does not contain restricted liquids) if cabin space is insufficient.
- Passengers connecting through a third country should verify whether local regulations permit onward carriage of STEB-sealed duty-free liquids, as connecting security checkpoints in some countries may not recognize another country's STEB seal.

2.8 Cabin Baggage Comparison Table

| Feature        | Economy     | Premium Economy | Business    | First       |
|----------------|-------------|-----------------|-------------|-------------|
| Cabin Bags     | 1           | 1               | 1           | 2           |
| Weight per Bag | 7 kg        | 10 kg           | 10 kg       | 10 kg       |
| Bag Dimensions | 55x40x20 cm | 55x40x20 cm     | 55x40x20 cm | 55x40x20 cm |
| Personal Item  | Yes         | Yes             | Yes         | Yes         |
| Duty-Free Bag  | Permitted   | Permitted       | Permitted   | Permitted   |

\newpage

3. Checked Baggage Policy

3.1 The Piece Concept Explained

SkyHorizon Airways applies the **piece concept** to checked baggage on the majority of its network: passengers are allowed a specific number of pieces, each up to a maximum weight, rather than a single combined ("pooled") weight limit. This differs from the **weight concept**, under which the total combined weight of all checked baggage matters more than the number of individual bags.

- On SkyHorizon-operated flights, the piece concept applies, as set out in Sections 3.2 and 3.3.
- On certain interline and codeshare itineraries — particularly those involving onward carriage by a partner airline that applies the weight concept (commonly the case for some partners operating to North America) — the baggage rules of the operating carrier for that segment take precedence for that segment. The applicable allowance for each segment is shown on the passenger's e-ticket and baggage receipt.
- Passengers travelling on a single SkyHorizon-ticketed itinerary spanning multiple flight segments with different allowances are entitled to the **most generous single-segment allowance** applicable to their journey, applied to the entire itinerary.

### 3.2 Domestic Route Allowances

| Cabin Class     | Free Pieces | Maximum Weight per Piece |
|-----------------|-------------|--------------------------|
| Economy         | 1           | 20 kg                    |
| Premium Economy | 1           | 25 kg                    |
| Business        | 2           | 32 kg each               |
| First           | 3           | 32 kg each               |

### 3.3 International Route Allowances

| Cabin Class     | Free Pieces | Maximum Weight per Piece |
|-----------------|-------------|--------------------------|
| Economy         | 1           | 23 kg                    |
| Premium Economy | 2           | 30 kg each               |
| Business        | 2           | 32 kg each               |
| First           | 3           | 32 kg each               |

Maximum linear dimensions (length + width + height) for any standard checked piece, regardless of class or route, are **158 cm (62 in)**. Pieces exceeding this limit are handled as oversized baggage under Section 3.6.

### 3.4 Frequent Flyer Bonus Baggage

Members of the SkyHorizon Rewards loyalty programme (see SH-OPS-MAN-001, Section 1.10) receive additional free checked baggage on top of their fare-class allowance, regardless of cabin booked:

| Tier        | Bonus Checked Baggage                                                       |
|-------------|-----------------------------------------------------------------------------|
| Blue (Base) | None                                                                        |
| Silver      | 1 additional piece, up to the weight limit of the passenger's booked class  |
| Gold        | 2 additional pieces, up to the weight limit of the passenger's booked class |
| Platinum    | 3 additional pieces, up to the weight limit of the passenger's booked class |

Frequent flyer bonus baggage is automatically applied at check-in upon verification of the passenger's SkyHorizon Rewards membership number and does not need to be pre-purchased.

### 3.5 Extra Baggage Charges

Passengers wishing to check more pieces than their free allowance may pre-purchase additional pieces online (recommended, for a lower rate) or pay at the airport bag drop counter (subject to a higher rate and to space availability on the flight).

| Route Category                              | Extra Piece - Prepaid Online | Extra Piece - Paid at Airport |
|---------------------------------------------|------------------------------|-------------------------------|
| Domestic                                    | \$35                         | \$50                          |
| Short-Haul International (under 5 hours)    | \$60                         | \$85                          |
| Long-Haul International (5 hours and above) | \$90                         | \$130                         |

- Extra baggage charges apply per additional piece, up to the standard weight limit for the passenger's cabin class.
- A maximum of **10 checked pieces per passenger** (combining free allowance, frequent flyer bonus, and paid extra pieces) is accepted as standard baggage; passengers requiring more must contact SkyHorizon Cargo.
- Extra baggage fees are non-refundable once the associated flight has departed, but are fully refundable if cancelled before departure together with the underlying ticket, subject to the fare rules of that ticket.

### 3.6 Oversized Baggage

A piece of checked baggage with combined linear dimensions between 159 cm and 300 cm is classified as **oversized** and is subject to a flat handling fee in addition to any applicable weight-based charges.

| Route Category | Oversized Baggage Fee (per piece) |
|----------------|-----------------------------------|
| Domestic       | \$75                              |
| International  | \$100                             |

- Oversized baggage must still comply with the weight limits in Sections 3.2 and 3.3, or the overweight fees in Section 3.7, whichever applies.
- Baggage exceeding 300 cm combined linear dimension is not accepted as standard checked baggage under any circumstances and must be shipped through SkyHorizon Cargo.
- Certain special baggage categories (see Section 4) that naturally exceed standard dimensions, such as bicycles and surfboards, are subject to the special baggage handling fees described in their respective sections rather than the general oversized baggage fee, where a specific fee is published.

### 3.7 Overweight Baggage

A piece of checked baggage that exceeds the weight limit of the passenger's free allowance, but remains within SkyHorizon's maximum single-piece handling limit of **32 kg**, is classified as **overweight** and is charged as follows:

| Weight Over Allowance              | Domestic Fee | International Fee |
|------------------------------------|--------------|-------------------|
| 1 – 5 kg over                      | \$20         | \$30              |
| 6 – 10 kg over (up to 32 kg total) | \$45         | \$65              |

- SkyHorizon does not accept any single piece of checked baggage weighing more than **32 kg**, regardless of fee payment, due to manual handling safety limits at the ramp. Passengers with a single item exceeding 32 kg must repack into two or more pieces or arrange carriage through SkyHorizon Cargo.
- Overweight and excess piece charges are cumulative; a piece that is both an additional (excess) piece and overweight is charged both the applicable extra piece fee (Section 3.5) and the applicable overweight fee.

\newpage

## 4. Special Baggage

### 4.1 Sports Equipment

SkyHorizon accepts a wide range of sports equipment as checked baggage, subject to the packing requirements below. Unless otherwise stated, sports equipment is counted against

the passenger's standard free baggage allowance; equipment exceeding the free allowance or standard dimensions is charged per Sections 3.5–3.7 or the category-specific fee shown.

## 4.2 Musical Instruments

| Instrument Size                           | Handling Method                                                                                                 | Requirements                                                                                                                      |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| Small (violin, flute, small guitar)       | Cabin baggage, as the main cabin bag                                                                            | Must fit within 55x40x20 cm and the weight limit of the passenger's class                                                         |
| Medium (standard guitar, viola)           | Checked baggage, or a purchased extra cabin seat (CBBG service)                                                 | Hard case required for checked carriage; CBBG seat priced at the applicable one-way fare for the route                            |
| Large (cello)                             | Purchased extra cabin seat (CBBG service) strongly recommended; checked carriage accepted only in a flight case | CBBG seat priced at the applicable one-way fare; checked cellos must use a rigid flight case and are handled as oversized baggage |
| Very Large (double bass, harp, drum kits) | Not accepted as checked or cabin baggage                                                                        | Must be booked through SkyHorizon Cargo                                                                                           |

All instruments accepted as checked baggage must be packed in a hard-shell case with adequate internal padding; SkyHorizon is not liable for damage to instruments packed in soft cases or gig bags.

## 4.3 Wheelchairs and Mobility Devices

- Manual and battery-powered wheelchairs and mobility scooters belonging to a passenger are carried **free of charge** and are **not counted** against the passenger's checked baggage allowance.
- Wheelchairs may be used up to the aircraft door and are returned to the passenger at the aircraft door on arrival wherever airport facilities allow; otherwise, they are returned at the baggage claim area.
- Battery-powered mobility devices are subject to the lithium battery and spillable/non-spillable battery rules in Section 5.2; passengers should declare the battery type at the time of booking so that ground staff can prepare the appropriate handling and stowage.
- Manual collapsible wheelchairs may additionally be permitted as a gate-checked item, stowed in the cabin closet or hold and returned at the aircraft door on arrival, subject to aircraft type and space availability.

## 4.4 Medical Equipment

- Essential medical equipment, including CPAP machines, oxygen concentrators, and

mobility aids, is carried **free of charge** and is **not counted** against the cabin or checked baggage allowance.

- Battery-operated medical devices must use batteries that comply with the lithium battery limits in Section 5.2; passengers are encouraged to carry spare batteries for the expected duration of travel, subject to those same limits.
- Devices requiring in-flight power connection (e.g., certain CPAP machines) should be confirmed as compatible with the aircraft's onboard power supply prior to travel; not all aircraft types in the SkyHorizon fleet offer in-seat power in all cabin classes.
- Passengers travelling with portable oxygen concentrators or requiring supplemental oxygen should also refer to the medical clearance requirements in SH-OPS-MAN-001, Section 4.2.

#### 4.5 Baby Strollers and Car Seats

- One collapsible stroller and one child car seat are each carried **free of charge** per infant or child, in addition to the accompanying adult's standard baggage allowance.
- Strollers may be used up to the aircraft door and gate-checked, or checked in at the regular check-in counter, at the passenger's preference.
- Car seats intended for in-flight use on a separately purchased child seat must be certified for aviation use and may be inspected by cabin crew before installation is approved.

#### 4.6 Bicycle Transport

- Bicycles must be packed in a rigid bicycle box or padded hard case, with handlebars turned sideways, pedals removed or folded inward, and tyres partially deflated.
- A packed bicycle is handled as **1 piece of checked baggage** and counts against the passenger's free allowance; if it exceeds 158 cm combined linear dimension (which is typical for most bicycle boxes), it is additionally subject to the oversized baggage fee in Section 3.6.
- Electric bicycles are subject to the lithium battery limits in Section 5.2; batteries exceeding 160 Wh are not accepted in any form on SkyHorizon flights.

#### 4.7 Surfboards and Water Sports Equipment

| Equipment                                   | Handling                                                                                                            |
|---------------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| Surfboard (single, up to 2.5 m)             | Accepted as 1 piece of checked baggage; oversized fee applies if combined linear dimension exceeds 158 cm           |
| Surfboard (multiple boards in 1 padded bag) | Accepted up to 3 boards per bag, charged as 1 oversized piece; a 4th board or more requires an additional piece fee |
| Windsurfing board and rig                   | Accepted as 2 pieces (board and rig/sail bag); both subject to oversized fees where applicable                      |

| Equipment                                  | Handling                                                                                                                                             |
|--------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| Diving equipment (BCD, regulator, wetsuit) | Accepted as standard checked baggage within weight limits; tanks must be carried empty with the valve open to confirm the absence of pressurized gas |

### 4.8 Golf Equipment

- A golf bag containing clubs, balls, and shoes is accepted as **1 piece of checked baggage**, counted against the passenger's free allowance if within the standard weight limit.
- Golf bags exceeding 158 cm combined linear dimension (uncommon, but possible with oversized travel covers) are subject to the oversized baggage fee.
- Hard-shell or padded golf travel bags are recommended; SkyHorizon's liability for damage to clubs in soft, unpadded bags is limited under the standard checked baggage liability framework in Section 9.3.

### 4.9 Ski and Snowboard Equipment

- Skis (a pair), poles, and boots may be combined into a single ski bag and boot bag, accepted as **2 pieces of checked baggage** (1 ski/pole bag, 1 boot bag), or combined into 1 piece if the passenger's equipment bag accommodates both.
- A single snowboard with boots is accepted as **1 piece of checked baggage**.
- Standard weight limits apply; ski and snowboard equipment bags are not automatically classified as oversized unless they exceed 158 cm combined linear dimension.

\newpage

## 5. Dangerous Goods

### 5.1 Classification Overview

Dangerous goods are articles or substances capable of posing a risk to health, safety, property, or the aircraft. SkyHorizon Airways accepts dangerous goods for carriage only in strict accordance with the IATA Dangerous Goods Regulations (DGR) and the SkyHorizon Dangerous Goods Acceptance Manual (SH-DG-001). Where any conflict exists between this policy document and SH-DG-001, the Dangerous Goods Acceptance Manual takes precedence.

Passengers are reminded that:

- The carriage of undeclared dangerous goods is a serious offence under aviation law and may result in criminal prosecution, in addition to removal from the flight.
- Items that appear harmless in everyday use may be classified as dangerous goods in the context of air travel; common examples include portable power banks, aerosol

sprays, and certain medical devices.

- SkyHorizon staff at check-in, bag drop, and the departure gate are authorised to inspect any bag or item where there is reasonable suspicion that it contains an undeclared dangerous good.
- The categories described in Sections 5.2–5.10 below are a guide for common passenger items; the definitive classification authority is SH-DG-001. Passengers who are uncertain whether a specific item is permitted should contact SkyHorizon Customer Relations prior to travel.

## 5.2 Lithium Batteries

Lithium batteries — including lithium-ion (Li-ion) and lithium metal (Li-metal) types — are subject to strict carriage rules due to the risk of thermal runaway if damaged, short-circuited, or improperly stored.

| Battery Type                     | Watt-Hour (Wh) /<br>Lithium Content<br>(g) Rating | Cabin Baggage                                          | Checked Baggage                                                      |
|----------------------------------|---------------------------------------------------|--------------------------------------------------------|----------------------------------------------------------------------|
| Lithium-ion<br>(rechargeable)    | Up to 100 Wh                                      | Permitted                                              | Permitted only inside a device; spare/loose cells prohibited         |
| Lithium-ion<br>(rechargeable)    | 101–160 Wh                                        | Permitted (maximum 2 spare batteries)                  | Prohibited as spare; permitted inside a device with airline approval |
| Lithium-ion<br>(rechargeable)    | Over 160 Wh                                       | Prohibited                                             | Prohibited                                                           |
| Lithium metal (non-rechargeable) | Up to 2 g lithium content                         | Permitted                                              | Prohibited as spare                                                  |
| Lithium metal (non-rechargeable) | 2–8 g lithium content                             | Permitted (maximum 2 batteries, with airline approval) | Prohibited                                                           |
| Lithium metal (non-rechargeable) | Over 8 g lithium content                          | Prohibited                                             | Prohibited                                                           |

Additional requirements:

- Spare lithium batteries must be individually protected against short circuit (e.g., in original retail packaging, a battery case, or with tape over terminals) and carried in cabin baggage only.
- Devices containing lithium batteries must be protected against accidental activation.

- Batteries must not be damaged, recalled, or subject to a manufacturer's advisory. SkyHorizon may refuse carriage of batteries that show visible signs of damage, swelling, or leakage.
- Electric bicycles, e-scooters, and similar vehicles with batteries exceeding 160 Wh are not accepted in any form on SkyHorizon flights; see Section 4.6 for electric bicycle provisions.

### 5.3 Power Banks

Portable power banks (external battery chargers) are classified as spare lithium-ion batteries for the purposes of air transport regulation and are subject to the same Wh limits as those in Section 5.2:

- Power banks up to 100 Wh: permitted in cabin baggage; maximum 2 units.
- Power banks 101–160 Wh: permitted in cabin baggage with prior airline approval; maximum 2 units; prohibited in checked baggage.
- Power banks over 160 Wh: prohibited on all SkyHorizon flights.
- Power banks must not be charged or connected to a device during the flight unless the airline's onboard USB or power outlet is used; improvised charging arrangements using extension cables or multi-socket adapters from carry-on bags are not permitted.
- The rated Wh capacity must be legibly marked on the power bank; units without a visible Wh rating will not be accepted unless the passenger can calculate it from the mAh and voltage markings on the device ( $\text{Wh} = \text{mAh} \div 1,000 \times \text{V}$ ).

### 5.4 Flammable Liquids and Gases

The following restrictions apply to flammable liquids and gases in passenger baggage:

- **Alcoholic beverages:** Alcoholic beverages with alcohol content between 24% and 70% by volume may be carried in checked baggage only, up to 5 litres per passenger in retail packaging. Beverages above 70% alcohol content are prohibited in cabin and checked baggage. Beverages at or below 24% alcohol are not subject to quantity restrictions.
- **Perfumes and colognes:** Permitted in cabin baggage subject to the standard 100 ml per container liquid rule (see Section 6.2). Larger quantities must be packed in checked baggage, up to 0.5 kg or 0.5 litres per item and 2 kg or 2 litres total per passenger.
- **Fuels:** Camping gas canisters, petrol, lighter fuel, and other flammable fuels in any quantity are prohibited in both cabin and checked baggage.
- **Lighters:** One small disposable or refillable lighter is permitted in the passenger's pocket or cabin baggage; lighter fuel refill canisters are prohibited. Strike-anywhere matches are prohibited; safety matches (one book) are permitted.

5.5 Firearms and Ammunition

Firearms (including replica or deactivated firearms, air guns, and paintball guns) and ammunition must be declared at check-in and may only be carried as checked baggage, subject to the following conditions:

- The firearm must be unloaded, with the safety catch engaged, and packed in a hard-sided, locked container to which only the passenger holds the key or combination.
- The passenger must comply with all laws of the departure, transit, and destination countries regarding the import and export of firearms; SkyHorizon does not accept liability for refusal of entry by authorities at any point on the itinerary.
- Ammunition must be securely packaged in the original manufacturer's packaging or equivalent, not exceeding 5 kg per passenger. Ammunition classified as explosive projectiles (hollow-point or incendiary rounds) is prohibited in both cabin and checked baggage.
- Firearms and ammunition must not be packed in the same container.
- All firearm check-in requests must be declared verbally or in writing to a SkyHorizon check-in agent; self-service bag drop is not available for itineraries including firearms.

5.6 Aerosols

Non-flammable aerosols for personal care (deodorant, hairspray) and sports use are permitted subject to the following limits:

| Location        | Container Size Limit                                       | Total Quantity Limit per Passenger |
|-----------------|------------------------------------------------------------|------------------------------------|
| Cabin Baggage   | 100 ml per container (subject to Section 6.2 liquid rules) | As per standard liquids bag limit  |
| Checked Baggage | 500 ml per container                                       | 2 kg or 2 litres total             |

- Aerosols must not be packed in a way that could cause accidental discharge; caps must be in place.
- Aerosols marked as flammable (UN1950 Aerosols, Flammable) in quantities greater than those listed above, or for non-personal-use purposes (paint, industrial cleaners), are prohibited in cabin and checked baggage.
- Medicinal aerosols (e.g., asthma inhalers) are not subject to the quantity limits above and are exempt from the liquid restrictions in Section 6 when required for use during the flight; see Section 6.4.

5.7 Chemicals and Toxic Substances

Toxic, corrosive, oxidising, and radioactive substances are prohibited in both cabin and

checked baggage except in very limited circumstances, as described in SH-DG-001.

Examples of prohibited items include:

- Bleach, pool chemicals, and oxidising cleaning products.
- Battery acid and mercury thermometers.
- Infectious substances, biological materials, and medical specimens, unless cleared under a specific regulatory exemption and declared prior to travel.
- Radioactive materials, except small quantities in approved consumer products (e.g., smoke detector elements, watch dials).

Passengers travelling for scientific, research, or industrial purposes requiring carriage of hazardous chemicals should contact SkyHorizon Cargo.

### **5.8 Compressed Gas Cylinders**

- Small cylinders of non-flammable, non-toxic compressed gas (CO<sub>2</sub> cartridges) for personal safety devices (life jackets, avalanche airbags) are permitted in checked baggage, up to 4 cartridges not exceeding 50 ml water capacity each.
- Self-defence spray (mace, pepper spray) in checked baggage only, up to 100 ml, provided it has a safety mechanism to prevent accidental discharge.
- Scuba diving tanks must be empty with the valve open to confirm the absence of pressurised gas; see Section 4.7.
- Avalanche rescue backpacks with airbag systems are permitted in checked baggage provided the compressed gas cylinder has been removed and declared as a separate item; the battery-powered trigger mechanism is subject to lithium battery rules in Section 5.2.

### **5.9 Sharp Objects**

- Sharp objects such as scissors (blade ≤6 cm), disposable razors, nail files, and knitting needles are permitted in cabin baggage.
- Scissors with blades exceeding 6 cm, box cutters, craft knives, and similar blades must be packed in checked baggage.
- Knives of any blade length (including penknives, folding knives, and multi-tools with a blade) are prohibited in cabin baggage and must be packed in checked baggage, sheathed, or wrapped securely to prevent injury to baggage handlers.
- Swords, machetes, and other large cutting instruments must be carried in checked baggage and declared at check-in.

### **5.10 Explosives and Incendiary Devices**

All explosives and incendiary devices are strictly prohibited on all SkyHorizon flights in both cabin and checked baggage, including but not limited to:

- Fireworks, flares, and pyrotechnic devices.

- Blasting caps, detonators, and fuses.
- Replica or imitation explosives.
- Hand grenades (including inert display items).
- Any item designed to ignite or explode, regardless of stated purpose.

Passengers who discover an item of concern in their baggage or the baggage of another person are requested to inform a SkyHorizon staff member or airport security officer immediately.

\newpage

## 6. Liquid Rules

### 6.1 International Liquid Restrictions

SkyHorizon Airways complies with the internationally harmonised security restrictions on liquids, aerosols, and gels (LAGs) carried in cabin baggage on international flights. These restrictions are mandated by aviation security regulations in most countries in which SkyHorizon operates and apply at the point of security screening, irrespective of the airline's own baggage policy.

- Liquids, aerosols, and gels in cabin baggage on international flights are subject to the 100 ml rule described in Section 6.2.
- These restrictions do not apply to checked baggage, which is screened separately and not subject to the same container size limits (though substance-type restrictions still apply under Section 5).
- Domestic flights within some countries may not apply the liquid restriction at security; however, SkyHorizon recommends passengers always comply, as rules vary by airport and security authority.

### 6.2 The 100 ml Rule

On international flights, each container of liquid, aerosol, or gel carried in cabin baggage must not exceed **100 ml (3.4 fl oz)** in volume. The following conditions apply:

- All LAG containers must fit within a single **transparent, resealable plastic bag** with a maximum capacity of **1 litre** (approximately 20 cm × 20 cm); see Section 6.3.
- Only one such bag is permitted per passenger.
- The bag must be presented separately at the security screening checkpoint.
- Containers larger than 100 ml are not permitted in cabin baggage even if only partially filled.

The 100 ml rule applies to all substances in liquid, aerosol, gel, paste, or cream form, including (but not limited to):

- Water and other drinks.

- Sunscreen, foundation, lip gloss, mascara, and cosmetic creams.
- Toothpaste and shaving gel.
- Honey, jams, and similar food spreads.
- Liquid soaps and shower gels.

### **6.3 Transparent Resealable Bags**

Passengers must use a transparent, resealable plastic bag to present their cabin liquids at security:

- The bag must be transparent so that the contents are visible.
- The bag must be resealable (a zip-lock style closure is typical).
- Maximum bag capacity is 1 litre; the bag must be capable of being sealed with all items inside.
- Bags provided free of charge at SkyHorizon check-in and bag drop counters meet these requirements; passengers who already have a compliant bag need not obtain a new one.
- Only one liquids bag per passenger is accepted at the security checkpoint, regardless of how many LAG items the passenger wishes to carry.

### **6.4 Medicines and Medical Liquids**

Medicines and medical liquids required for use during the flight are exempt from the 100 ml per container rule when the following conditions are met:

- The passenger can demonstrate that the medicine is required during the flight (not merely during the trip) — for example, by presenting a valid prescription, a pharmacist's label, a letter from a treating physician, or other medical documentation.
- The quantity presented is consistent with the duration of the flight and immediate transit time.
- Security officers at the checkpoint will make the final determination on whether an item qualifies as a medical exemption; SkyHorizon recommends passengers carry supporting documentation to minimise delays.

Medicines in solid form (tablets, capsules) are not subject to liquid restrictions and may be carried in any quantity in cabin baggage. Liquid medicines in quantities exceeding cabin liquid limits that are not required during the flight should be packed in checked baggage.

### **6.5 Baby Food and Milk**

Baby food, formula, breast milk, and sterilised water for infant use carried in quantities sufficient for the flight journey are exempt from the standard 100 ml rule and the one-litre transparent bag requirement, subject to the following:

- The exemption applies to the quantity required for the duration of the flight, not the entire trip.

- Passengers travelling with an infant (under 24 months) may carry larger volumes; passengers without an accompanying infant who claim this exemption may be asked to verify the purpose at security.
- Baby food in jars, pouches, or other containers is subject to standard LAG rules unless it is for use during the flight by an infant or young child.

## 6.6 Duty-Free Liquids

Liquid goods purchased at an airport duty-free outlet after security screening, or purchased onboard via the SkyHorizon SkyShop service, may be carried through subsequent security checkpoints in the same day of travel, subject to the following conditions:

- The liquid must remain sealed in the **Security Tamper-Evident Bag (STEB)** provided by the duty-free retailer.
- The bag must not be opened or tampered with after purchase; a broken or re-sealed STEB will not be accepted at subsequent security checkpoints.
- The purchase receipt showing the date, time, and point of sale must remain visible through the bag.
- Passengers connecting through a third country should verify that the security authority at the connecting airport recognises STEBs, as some countries (particularly on certain transit routes) do not accept STEB-sealed duty-free liquids and may require their disposal. SkyHorizon is unable to accept responsibility for duty-free liquids confiscated at connecting airports.
- Duty-free liquids that are subsequently repacked into cabin baggage or removed from the STEB before arriving at the destination are subject to standard liquid rules at the next screening point.

\newpage

## 7. Electronic Devices

### 7.1 Laptops and Tablets

- Laptops and tablets may be carried in cabin or checked baggage.
- Aviation security regulations at many airports require laptops to be removed from their bag and placed in a tray separately at the security screening checkpoint; passengers are advised to ensure their laptop is readily accessible in cabin baggage.
- SkyHorizon recommends carrying laptops in cabin baggage rather than checked baggage to minimise the risk of damage and to comply with the lithium battery guidelines in Section 5.2 (laptop batteries are typically in the 30–100 Wh range and are subject to those provisions).
- Laptops placed in checked baggage must be powered off (not in sleep or hibernate mode) and protected from pressure and impact damage.
- In-flight use of laptops is permitted from the completion of the take-off roll until the illumination of the seatbelt sign for landing approach, and during cruise phase,

subject to the cabin crew's announcement on each flight. Devices must be switched to Aeroplane Mode unless the aircraft is equipped with an approved onboard Wi-Fi system and its use is announced.

## 7.2 Mobile Phones and Cameras

- Mobile phones and cameras may be carried in cabin or checked baggage.
- Devices must be switched to Aeroplane Mode during all phases of flight, unless the cabin crew announces that onboard connectivity is available via the SkyHorizon Connect Wi-Fi system.
- Spare camera batteries (lithium-ion) are subject to the limits in Section 5.2 and must be carried in cabin baggage.
- Film cameras: Carry-on is strongly recommended to avoid damage from hold baggage X-ray systems, which may be more powerful than cabin screening equipment at some airports.

## 7.3 Drones

Drones (unmanned aerial vehicles/UAVs) may be carried as checked baggage or cabin baggage, subject to the following:

| Battery Capacity         | Carriage in Cabin                     | Carriage in Hold                                 |
|--------------------------|---------------------------------------|--------------------------------------------------|
| Up to 100 Wh per battery | Permitted                             | Drone body permitted; batteries must be in cabin |
| 101-160 Wh per battery   | Permitted with prior airline approval | Drone body permitted; batteries must be in cabin |
| Over 160 Wh per battery  | Prohibited                            | Prohibited                                       |

- Drone batteries must be treated as spare lithium-ion batteries (Section 5.2 and 5.3) and stored in cabin baggage, individually protected against short circuit.
- The drone body (without batteries) may be checked as standard baggage, counting against the passenger's free allowance.
- SkyHorizon does not certify or advise on the legality of drone operation at the passenger's destination; passengers are responsible for checking local civil aviation authority regulations.

## 7.4 Smart Luggage

Smart luggage — bags with embedded lithium battery systems powering GPS trackers, USB charging ports, electronic locks, or motorised wheels — is subject to the following conditions:

- Smart luggage with a **removable battery** is accepted in cabin and checked baggage; the battery must be removed from checked bags before they are accepted at bag drop, and carried in the cabin by the passenger, subject to the Wh limits in Section 5.2.
- Smart luggage with a **non-removable battery** is accepted in cabin baggage only; it may not be carried in the hold.
- Batteries rated above 160 Wh in any smart luggage are not accepted on SkyHorizon flights.
- Electronic locks on smart luggage that are battery-powered: the battery for the lock mechanism may remain in the bag, provided it falls within the permitted Wh limits, as it is integral to the lock and not separately removable. Passengers should be prepared to open the bag manually if the battery fails during handling.

7.5 Power Banks and Chargers (Carriage Summary)

The following summary table applies to portable chargers and power banks specifically; refer to Section 5.3 for full provisions:

| Capacity                           | Cabin Baggage                       | Checked Baggage | Maximum Units |
|------------------------------------|-------------------------------------|-----------------|---------------|
| Up to 100 Wh (≈27,000 mAh at 3.7V) | Permitted                           | Prohibited      | 2             |
| 101-160 Wh                         | Permitted (prior approval required) | Prohibited      | 2             |
| Over 160 Wh                        | Prohibited                          | Prohibited      | N/A           |

- Wireless charging pads and wired chargers (without battery cells) are not subject to the above limits and may be freely carried in cabin or checked baggage.
- Multi-device hub chargers that contain no battery cells are classified as electronic accessories, not power banks, and are unrestricted.

\newpage

8. Pets

8.1 In-Cabin Pet Travel (PETC)

SkyHorizon Airways permits small domestic pets (cats and dogs) to travel in the aircraft cabin on selected routes, subject to availability and pre-booking requirements:

- In-cabin pets must be booked in advance through the SkyHorizon Contact Centre or airport ticket office; in-cabin pet spaces are limited per flight and are subject to confirmation.

- The pet, together with its carrier, must not exceed **8 kg combined weight**.
- A maximum of **1 pet carrier per passenger** is permitted in the cabin; only **2 pet carriers per flight** are accepted in the cabin across all passengers.
- The pet carrier is not counted against the passenger's cabin baggage allowance but must fit fully under the seat in front (see Section 8.4 for carrier dimension requirements); it may not occupy the overhead bin.
- Pets must remain inside their carrier throughout the flight; the carrier must not be opened in the cabin.
- A pet fee applies per flight segment; see the SkyHorizon website for the current rate. Frequent flyer status does not waive the pet fee.
- In-cabin pet travel is not available on all routes; certain domestic and international services are operated by aircraft types with restricted under-seat space. The Contact Centre can advise on route-specific availability.

## 8.2 Cargo Hold Pet Travel (AVIH)

Pets that are too large for in-cabin travel, or on routes where PETC is not available, may be accepted as accompanied baggage in the temperature- and pressure-controlled hold (AVIH — Animals in the Hold):

- AVIH must be booked in advance and confirmed by SkyHorizon at least **72 hours before departure**; last-minute AVIH requests may not be accommodated.
- The pet and carrier combined must not exceed **32 kg** (the standard single-piece maximum weight).
- AVIH is treated as a checked baggage item and counts against the passenger's checked baggage allowance; if it causes the total to exceed the free allowance, standard excess baggage charges apply (Section 3.5).
- SkyHorizon operates AVIH only on routes where hold conditions are certified for live animal transport; AVIH is **not available** on certain short-haul flights operated by ATR or Dash 8 turboprop aircraft due to hold pressurisation limitations. Confirm availability when booking.
- A separate AVIH service fee applies per flight segment.

## 8.3 Required Documentation

Passengers travelling with pets (PETC or AVIH) must present the following at check-in, unless otherwise stated:

- **Health certificate** issued by a licensed veterinarian, dated within 10 days of the date of travel (or as required by the destination country — some countries require certification issued within fewer days).
- **Import permit** for the destination country, where required by that country's authorities (passengers are responsible for determining whether a permit is required).
- **Export permit** for the country of departure, where required.

- **Vaccination records**, in particular for rabies; see Section 8.5 for vaccination requirements.
- Any additional documentation required by the destination or transit country (e.g., a certificate of microchipping, treatment for specific parasites, or a veterinary inspection certificate from a government-approved veterinarian).

SkyHorizon accepts no liability for pets refused entry or confiscated at the destination or transit country due to insufficient or incorrect documentation. Passengers are strongly advised to contact the destination country's embassy, consulate, or biosecurity authority well in advance of travel to confirm the applicable requirements.

## 8.4 Weight and Carrier Requirements

| Travel Type     | Maximum Combined Weight (Pet + Carrier) | Carrier Requirements                                                                                                                             |
|-----------------|-----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| In-Cabin (PETC) | 8 kg                                    | Soft-sided, ventilated on at least 3 sides; maximum dimensions 45 cm × 35 cm × 25 cm; must fit under seat                                        |
| Hold (AVIH)     | 32 kg                                   | IATA-compliant rigid plastic or metal airline-approved kennel; must have a water tray, secure latch, ventilation panels, and "Live Animal" label |

- AVIH kennels must be large enough for the animal to stand, turn around, and lie down naturally.
- SkyHorizon does not provide pet carriers or kennels at the airport; passengers must arrive with a compliant carrier.
- Carriers that do not comply with the requirements above will not be accepted, and the passenger and pet will be refused boarding without refund of the pet fee.

## 8.5 Vaccination Requirements

SkyHorizon requires, as a minimum, proof of current vaccination for:

| Vaccination                                            | Species       | Minimum Valid From                | Notes                                                                                                 |
|--------------------------------------------------------|---------------|-----------------------------------|-------------------------------------------------------------------------------------------------------|
| Rabies                                                 | Dogs and cats | 30 days after primary vaccination | Must be within the validity period specified by the issuing country's authority (typically 1–3 years) |
| Distemper, Parvovirus, Adenovirus (DHPP/DHPPi)         | Dogs          | As per veterinary records         | Not required by SkyHorizon but commonly required by destination countries                             |
| Feline Panleukopenia, Herpesvirus, Calicivirus (FVRCP) | Cats          | As per veterinary records         | Not required by SkyHorizon but commonly required by destination countries                             |

- Destination countries may impose additional or more stringent vaccination requirements; passengers are responsible for compliance.
- Puppies and kittens under 16 weeks of age may not have completed a full primary vaccination course; carriage in these cases is subject to destination country rules and, if applicable, proof from a veterinarian that the animal is as fully vaccinated as its age permits.
