

SkyHorizon Airways

Airline Policy & Operations Manual

Document Number: SH-OPS-MAN-001 **Revision:** 4.2 **Effective Date:** 01 March 2026
Classification: Internal Use – Controlled Document **Issuing Authority:** Corporate Operations & Safety Division, SkyHorizon Airways **Approved By:** Vice President, Flight Operations

This manual is a fictional document prepared for academic project purposes. SkyHorizon Airways is not a real airline. All procedures, figures, and identifiers described herein are illustrative and do not correspond to any real-world carrier, regulator, or operating certificate.

Document Control

Field	Detail
Document Owner	Corporate Operations & Safety Division
Document Custodian	Manager, Policy & Compliance
Review Cycle	Annual, or upon regulatory change
Distribution	Flight Crew, Cabin Crew, Ground Operations, Station Managers, Customer Service, Training Academy, Quality & Safety Office
Confidentiality	Internal Use Only – Not for External Distribution
Storage Location	SkyHorizon Document Management System (SH-DMS), Folder: OPS/MANUALS

Revision History

Revision	Date	Description of Change	Approved By
1.0	14 May 2014	Initial issue following AOC certification	Director of Operations
2.0	02 Sep 2017	Fleet expansion update; added A321neo and A330 sections	VP Operations

Revision	Date	Description of Change	Approved By
3.0	19 Jan 2021	Post-disruption revision; updated health, hygiene, and rebooking policy	VP Operations
4.0	11 Nov 2024	Digital check-in overhaul; updated kiosk and biometric boarding sections	VP Operations
4.1	06 Jul 2025	Updated baggage allowances and lounge access matrix	Manager, Policy & Compliance
4.2	01 Mar 2026	Updated route network, fleet count, and customer support channels	VP Operations

Statement of Authority

This manual is issued under the authority of the Vice President, Flight Operations, and the Chief Executive Officer of SkyHorizon Airways. It constitutes the official internal reference for all policy, procedural, and operational standards governing the airline's commercial and ground operations. All employees, contracted ground handling agents, and cabin crew are required to comply with the provisions of this manual. Any deviation must be authorized in writing by the relevant Head of Department.

This document is reviewed annually by the Policy & Compliance Office and updated whenever operational, regulatory, or commercial changes require it. Personnel are responsible for working from the current controlled revision only, available through the SkyHorizon Document Management System (SH-DMS).

1. Company Overview

1.1 About SkyHorizon Airways

SkyHorizon Airways is a full-service scheduled airline operating domestic and international passenger services from its home base in the Republic of Meridia. Founded in 2013 and commencing commercial operations in 2014, the airline was established to provide a connected, reliable, and premium-standard air travel option linking secondary and primary cities within Meridia to key international business and leisure destinations.

Since its founding, SkyHorizon Airways has grown from a regional operator with a fleet of six narrow-body aircraft to a full-service network carrier operating a mixed fleet of narrow-body and wide-body aircraft across domestic and intercontinental routes. The airline holds a full Air Operator's Certificate (AOC) issued by the Meridia Civil Aviation Authority (MCAA) and operates under International Air Transport Association (IATA) designator **SH** and International Civil Aviation Organization (ICAO) designator **SHZ**, with the radio callsign "**SKYHORIZON**."

SkyHorizon Airways is structured as a public limited company, headquartered in Meridian City, and is a member of the Meridia Airlines Association (MAA). The airline maintains

interline and codeshare agreements with several international partner carriers to extend its network reach beyond its own operated routes.

1.2 Mission Statement

"To connect the people of Meridia to the world through safe, reliable, and dignified air travel, delivered with consistency and care at every point of the journey."

SkyHorizon Airways exists to make air travel dependable and accessible without compromising on safety or service standards. The airline's commercial strategy is built around predictable scheduling, transparent pricing, and a consistent passenger experience across every cabin class and route type.

1.3 Vision Statement

"To be the most trusted airline in the Meridia region, recognized for operational reliability, passenger-first service, and responsible growth."

The airline's long-term vision centers on three pillars: expanding the route network in a financially sustainable manner, maintaining among the highest on-time performance ratings in the region, and building a workforce culture where safety and service excellence are non-negotiable standards rather than aspirational goals.

1.4 Core Values

SkyHorizon Airways operates according to five core values that guide every department, from flight operations to customer support:

- **Safety First** – No commercial, scheduling, or cost consideration ever takes precedence over the safety of passengers, crew, or aircraft.
- **Reliability** – Passengers plan their lives around flight schedules; the airline is committed to operating on time and informing passengers promptly when this is not possible.
- **Respect** – Every passenger, regardless of fare class, is treated with courtesy, dignity, and fairness.
- **Accountability** – Employees and the organization as a whole take ownership of mistakes and work transparently to correct them.
- **Continuous Improvement** – Processes, training, and technology are reviewed and upgraded on an ongoing basis rather than left static.

1.5 Corporate Headquarters

SkyHorizon Airways' corporate headquarters, **SkyHorizon Tower**, is located adjacent to Meridian International Airport in Meridian City, Republic of Meridia. The headquarters houses the executive leadership team, Corporate Operations & Safety Division, Commercial & Network Planning, Finance, Human Resources, Legal & Regulatory Affairs, and the SkyHorizon Training Academy.

Department	Location
Executive Office	SkyHorizon Tower, Floor 18, Meridian City
Flight Operations & Safety	SkyHorizon Tower, Floor 14-16
Commercial & Network Planning	SkyHorizon Tower, Floor 12
Customer Experience & Support	SkyHorizon Tower, Floor 9
Training Academy	SkyHorizon Campus, Meridian International Airport (MDI) Cargo Road
Maintenance & Engineering Base	SkyHorizon Technical Centre, MDI East Apron

1.6 Hub Airports

SkyHorizon Airways operates a hub-and-spoke network anchored by three hub airports within Meridia, supplemented by a network of focus cities for regional connectivity.

Hub	Airport	Code (IATA/ICAO)	Role
Primary Hub	Meridian International Airport	MDI / ZMMD	Main international gateway and airline headquarters base
Secondary Hub	Coastal Bay International Airport	CBI / ZCBI	International and domestic connections for the southern region
Regional Hub	Highland Gateway Airport	HGA / ZHGA	Domestic feeder hub for highland and northern routes

Meridian International Airport (MDI) handles the majority of SkyHorizon's wide-body international departures and serves as the primary maintenance and crew base. Coastal Bay International Airport (CBI) supports the airline's growing leisure and medium-haul international network, while Highland Gateway Airport (HGA) primarily supports narrow-body domestic feeder services connecting smaller communities into the broader network.

1.7 Fleet Overview

SkyHorizon Airways operates a modern, fuel-efficient mixed fleet consisting of narrow-body aircraft for domestic and regional routes and wide-body aircraft for medium- and

long-haul international routes. As of the effective date of this manual, the operating fleet comprises 110 aircraft.

Aircraft Type	Fleet Size	Typical Seating Configuration	Total Seats	Primary Use
Airbus A320neo	45	12 Business / 168 Economy	180	Domestic, short regional
Airbus A321neo	20	8 Business / 20 Premium Economy / 186 Economy	214	Domestic, short international
Boeing 737 MAX 8	15	16 Business / 162 Economy	178	Domestic, regional
Airbus A330-300	12	24 Business / 36 Premium Economy / 213 Economy	273	Medium- to long-haul international
Boeing 787-9 Dreamliner	10	28 Business / 35 Premium Economy / 188 Economy	251	Long-haul international
Airbus A350-900 ("Flagship")	8	8 First / 42 Business / 36 Premium Economy / 224 Economy	310	Ultra-long-haul flagship routes

Note: First Class is offered exclusively aboard the Airbus A350-900 "Flagship" aircraft, deployed on the airline's premier ultra-long-haul intercontinental routes. No other aircraft type in the SkyHorizon fleet carries a First Class cabin.

The average fleet age is 6.4 years. All aircraft are maintained under SkyHorizon's MCAA-approved Continuing Airworthiness Maintenance Programme, with heavy maintenance checks performed at the SkyHorizon Technical Centre at MDI or at MCAA-approved partner maintenance, repair, and overhaul (MRO) facilities.

1.8 Route Network

SkyHorizon Airways operates a combined network of 12 domestic destinations within the Republic of Meridia and 10 international destinations across the Middle East, Asia-Pacific, Europe, and North America.

Domestic Network (served from MDI, CBI, and HGA hubs):

Destination City	Airport Code	Served From
Meridian City	MDI	Hub
Coastal Bay	CBI	Hub
Highland Falls	HGA	Hub
Rivermouth	RVM	MDI, CBI
Lakeside	LKS	MDI, HGA
Sandport	SDP	CBI
Northfield	NFD	HGA
Westbrook	WBK	MDI
Eastgate	EGT	MDI, CBI
Silverpine	SPN	HGA
Goldcrest	GLC	MDI
Bluewater	BWR	CBI, HGA

International Network (served from MDI and CBI hubs):

Destination City	Airport Code	Region	Aircraft Type Typically Operated
Dubai	DXB	Middle East	A321neo / A330-300
Doha	DOH	Middle East	A330-300
Singapore	SIN	Asia-Pacific	A330-300 / B787-9
Bangkok	BKK	Asia-Pacific	A321neo / B787-9
Hong Kong	HKG	Asia-Pacific	B787-9
Tokyo (Narita)	NRT	Asia-Pacific	B787-9 / A350-900
London (Heathrow)	LHR	Europe	A350-900
Frankfurt	FRA	Europe	B787-9
New York (JFK)	JFK	North America	A350-900
Sydney	SYD	Asia-Pacific	A350-900

The network is structured so that connecting passengers from any domestic point can reach any international destination via a single connection at MDI or CBI, with minimum connection times of 60 minutes domestic-to-domestic, 75 minutes domestic-to-international, and 90 minutes international-to-international.

1.9 Corporate Structure

SkyHorizon Airways is governed by a Board of Directors chaired by an independent Non-Executive Chairman, with day-to-day management vested in the Chief Executive Officer (CEO). The CEO is supported by a senior leadership team organized into six functional divisions:

Division	Head	Core Responsibility
Flight Operations & Safety	Vice President, Flight Operations	Flight crew, cabin crew, safety, and operational control
Commercial & Network Planning	Vice President, Commercial	Route planning, pricing, revenue management, alliances
Engineering & Maintenance	Vice President, Engineering	Aircraft airworthiness, maintenance planning, technical records
Customer Experience	Vice President, Customer Experience	Customer service standards, contact centre, complaint resolution
Finance	Chief Financial Officer	Financial planning, treasury, procurement
People & Culture	Vice President, Human Resources	Recruitment, training academy, employee relations

Each division is further organized into departments led by Directors and Managers, with Station Managers at each airport reporting through the Flight Operations division for operational matters and the Commercial division for revenue and service matters.

1.10 SkyHorizon Rewards – Frequent Flyer Programme

SkyHorizon Rewards is the airline's loyalty programme, allowing members to earn and redeem points (SkyMiles Points) on SkyHorizon flights and with partner airlines and affiliated hotel, car rental, and credit card partners. Membership is structured across four tiers, determined by points or flight segments earned within a rolling 12-month qualification period.

Tier	Qualification (per 12 months)	Key Benefits
Blue (Base)	Automatic upon enrolment	Points earning on all paid fares, member-only fare access
Silver	25,000 qualifying points or 25 flight segments	Priority Boarding Group 2, 1 extra checked bag, Premium Economy upgrade bids
Gold	50,000 qualifying points or 50 flight segments	Lounge access on SkyHorizon-operated flights, Boarding Group 1, 2 extra checked bags, dedicated contact centre line
Platinum	100,000 qualifying points or 90 flight segments	Guaranteed lounge access including partner lounges, Boarding Group 1, complimentary Business Class upgrade (subject to availability), dedicated check-in

Points do not expire for members who complete at least one qualifying flight activity every 24 months. Points may be redeemed for flight awards, cabin upgrades, baggage allowance increases, and select partner rewards.

1.11 Awards and Industry Recognition

SkyHorizon Airways has received the following industry recognitions since commencing operations:

Year	Recognition
2018	"Best Regional Airline - Meridia Region" - Meridia Travel & Aviation Awards
2020	"Most Improved On-Time Performance" - Regional Aviation Council
2022	"Excellence in Cabin Crew Training" - Meridia Civil Aviation Authority Safety Recognition
2024	"Best Business Class Product - Regional Carrier" - Meridia Travel & Aviation Awards
2025	4-Star Airline Rating - Independent Airline Quality Rating Agency

\newpage

2. Airline Operations

2.1 Domestic Operations

SkyHorizon's domestic operations connect all 12 served cities within the Republic of Meridia through a hub-and-spoke structure centered on MDI, CBI, and HGA. Domestic flights are operated primarily using the Airbus A320neo and Boeing 737 MAX 8, with the

Airbus A321neo deployed on higher-demand domestic trunk routes such as Meridian City-Coastal Bay.

Domestic operations are governed by the following standards:

- Minimum scheduled block time includes a contingency buffer of 10 minutes over the calculated flight time to absorb minor air traffic control delays.
- All domestic routes are scheduled with a minimum ground time appropriate to the aircraft type (see Section 2.5).
- Domestic check-in counters close 45 minutes before scheduled departure; boarding gates close 15 minutes before scheduled departure.
- Domestic flights are scheduled to operate at a minimum frequency of one daily return service on trunk routes and a minimum of four weekly return services on thinner regional routes.

2.2 International Operations

International operations are coordinated by the International Operations Control Centre (IOCC) at MDI, which oversees crew scheduling, regulatory compliance (including overflight and landing permits), and slot coordination with foreign airport authorities.

Key standards governing international operations:

- All international flights are operated by crew holding valid type ratings, route qualifications, and current medical certification in accordance with MCAA and destination-state regulatory requirements.
- International check-in counters close 60 minutes before scheduled departure; boarding gates close 30 minutes before scheduled departure to accommodate immigration and security formalities.
- Long-haul flights exceeding 8 hours in block time are crewed with augmented flight crew (three or four pilots) in accordance with flight time limitation regulations.
- International flights carry fuel reserves calculated per regulatory requirements, including contingency fuel, alternate fuel, and final reserve fuel, with additional discretionary fuel at the commander's judgment.

2.3 Flight Number System

SkyHorizon Airways uses a structured four-digit flight numbering system to indicate route category and direction.

Flight Number Range	Category	Example
SH 100 – SH 1999	Domestic flights	SH 245 (Meridian City–Coastal Bay)
SH 2000 – SH 2999	Short-haul international (under 5 hours block time)	SH 2310 (Meridian City–Dubai)
SH 3000 – SH 4999	Medium-haul international	SH 3504 (Meridian City–Singapore)
SH 5000 – SH 6999	Long-haul intercontinental	SH 5821 (Meridian City–London)
SH 7000 – SH 7999	Cargo and charter operations	SH 7102
SH 8000 – SH 8999	Codeshare flights operated by partner carriers	SH 8045

Within each category, **odd-numbered flights operate outbound from the primary hub (MDI)**, while **even-numbered flights operate inbound toward the primary hub**. For example, SH 5821 operates Meridian City to London, while its return service is numbered SH 5822.

2.4 Daily Flight Scheduling

Flight schedules are constructed twice yearly (Northern Summer and Northern Winter scheduling seasons) by the Network Planning Department, with tactical adjustments made on a rolling basis up to 14 days before operation to respond to demand, slot changes, or seasonal patterns.

The daily scheduling process follows this sequence:

1. **Demand Forecasting** – Revenue Management analyzes historical load factors, booking curves, and seasonal trends for each route.
2. **Aircraft Routing** – Network Planning assigns aircraft tail numbers to rotations, ensuring each aircraft returns to a maintenance-capable base within required intervals.
3. **Crew Pairing** – Crew Scheduling builds pairings that comply with duty time and rest requirements, balancing crew base locations against route assignments.
4. **Slot Coordination** – For slot-constrained airports, the Airport Affairs team confirms landing and take-off slot allocations with the relevant airport coordinator.
5. **Schedule Publication** – Confirmed schedules are loaded into the Global Distribution System (GDS) and the SkyHorizon booking platform, typically 330 days in advance for long-haul routes and 180 days in advance for domestic routes.

6. **Day-of-Operations Monitoring** – The Operations Control Centre (OCC) monitors live performance and authorizes any schedule adjustments required on the day of operation.

2.5 Aircraft Turnaround Process

Aircraft turnaround is the sequence of activities performed between an aircraft's arrival at the gate and its subsequent departure. SkyHorizon targets the following minimum turnaround times by aircraft type:

Aircraft Type	Minimum Turnaround (Domestic)	Minimum Turnaround (International)
A320neo / 737 MAX 8	35 minutes	50 minutes
A321neo	40 minutes	55 minutes
A330-300	N/A	75 minutes
B787-9	N/A	90 minutes
A350-900	N/A	100 minutes

The standard turnaround sequence includes:

1. Marshalling and chocking of aircraft on arrival.
2. Passenger disembarkation via aerobridge or mobile stairs.
3. Cabin cleaning and catering replenishment.
4. Offloading and uploading of baggage and cargo.
5. Refuelling, conducted in parallel with cleaning and catering wherever ramp safety procedures allow.
6. Technical walk-around inspection by the licensed engineer or flight crew.
7. Loading of final cargo and baggage based on final passenger manifest.
8. Boarding of incoming passengers.
9. Doors closed, pushback clearance obtained, and departure.

Ground handling at all SkyHorizon stations is performed either by SkyHorizon's own ground handling subsidiary (at MDI, CBI, and HGA) or by contracted ground handling agents operating under SkyHorizon's Ground Operations Manual at outstations.

2.6 Airport Coordination

At each station, a designated **Station Manager** or, at smaller outstations, a **Duty Officer**, is responsible for coordinating all SkyHorizon activities with airport authorities, air traffic control, ground handling agents, fuel suppliers, and catering providers.

Key coordination responsibilities include:

- Daily liaison with airport slot coordinators to confirm gate and stand allocations.
- Coordination with air traffic control on expected departure sequencing during periods of congestion.
- Communication with the Operations Control Centre (OCC) regarding any local disruption, including weather, strikes, or infrastructure issues.
- Ensuring ground handling agents at outstations are briefed on SkyHorizon-specific procedures, particularly regarding special service requests (wheelchair passengers, unaccompanied minors, live animals, etc.).
- Submission of daily station performance reports covering on-time performance, baggage mishandling, and any irregularities.

2.7 Codeshare and Interline Partnerships

SkyHorizon Airways extends its network reach beyond its own operated routes through codeshare and interline agreements with partner carriers. Under a codeshare agreement, SkyHorizon may sell seats on a flight operated by a partner airline under an SH flight number (see Section 2.3, range SH 8000–8999), or a partner airline may sell seats on a SkyHorizon-operated flight under its own designator.

Agreement Type	Description	Passenger Impact
Codeshare	Flight marketed by one airline, operated by another	Single ticket, single check-in process where systems are integrated; baggage checked through to final destination
Interline	Separate airlines honour each other's tickets for connecting itineraries without a marketing codeshare	Baggage may need to be re-checked at the connection point unless an interline baggage agreement is in place
Special Prorate Agreement (SPA)	Commercial fare-sharing arrangement enabling combinable through-fares across two airlines' networks	Enables lower combined fares on connecting itineraries that would otherwise require two separate tickets

SkyHorizon's current codeshare and interline partners provide onward connectivity to over 60 additional destinations beyond the airline's own operated network, concentrated in Europe, the Middle East, and Asia-Pacific.

2.8 Crew Duty Time and Rest Requirements

All SkyHorizon flight and cabin crew scheduling complies with Flight Time Limitation (FTL) regulations issued by the Meridia Civil Aviation Authority. Key parameters applied

by the Crew Scheduling Department include:

Parameter	Standard Limit
Maximum Flight Duty Period (single crew, daytime)	13 hours
Maximum Flight Duty Period (augmented crew, long-haul)	Up to 18 hours, with in-flight rest facilities
Minimum Rest Period (between duties)	At least as long as the preceding duty period, minimum 12 hours
Maximum Flying Hours (rolling 28 days)	100 hours
Maximum Flying Hours (rolling 12 months)	1,000 hours

The Crew Scheduling Department monitors duty time accrual in real time through the Crew Management System, and the Operations Control Centre (OCC) is required to reassign or substitute crew whenever a delay would cause a scheduled duty period to exceed regulatory limits.

\newpage

3. Ticket Classes

SkyHorizon Airways offers up to four cabin classes depending on aircraft type and route: Economy, Premium Economy, Business, and First. First Class is available exclusively aboard the Airbus A350-900 "Flagship" aircraft on designated ultra-long-haul routes (see Section 1.7).

3.1 Economy Class

Economy Class is SkyHorizon's standard cabin, available on every flight across the network.

Feature	Specification
Seat Width	17.5 inches (44.5 cm)
Seat Pitch (Legroom)	30–32 inches depending on aircraft type
Recline	Up to 3 inches
Meals	Complimentary meal service on flights over 2 hours; snack and beverage service on shorter flights
Lounge Access	Not included
Priority Boarding	Not included (Boarding Groups 4–5)
Cabin Baggage Allowance	1 cabin bag up to 7 kg, plus 1 personal item
Checked Baggage Allowance	1 piece up to 20 kg (domestic) / 1 piece up to 23 kg (international)

Economy passengers may purchase optional add-ons including extra-legroom seat selection, additional baggage allowance, and pre-ordered special meals (vegetarian, vegan, halal, kosher, gluten-free, and diabetic options are available on request, subject to 24-hour advance notice).

3.2 Premium Economy Class

Premium Economy is available on the Airbus A321neo (international sectors), A330-300, Boeing 787-9, and Airbus A350-900.

Feature	Specification
Seat Width	18.5 inches (47 cm)
Seat Pitch (Legroom)	35–38 inches
Recline	Up to 5 inches, with leg rest on wide-body aircraft
Meals	Enhanced meal service with choice of two entrées, welcome beverage, and amenity kit on long-haul sectors
Lounge Access	Not included as standard; discounted lounge access available for purchase at MDI and CBI
Priority Boarding	Included (Boarding Group 2)
Cabin Baggage Allowance	1 cabin bag up to 10 kg, plus 1 personal item
Checked Baggage Allowance	1 piece up to 25 kg (domestic) / 2 pieces up to 30 kg each (international)

3.3 Business Class

Business Class is available on all aircraft types in the SkyHorizon fleet.

Feature	Specification
Seat Width	20-22 inches depending on aircraft type
Seat Pitch (Legroom)	42 inches (narrow-body, recliner seat) / 60 inches (wide-body, angled lie-flat or full lie-flat)
Recline	Recliner seat (narrow-body) / Lie-flat bed (wide-body: A330-300, B787-9, A350-900)
Meals	Multi-course chef-curated meal service with dine-on-demand option on long-haul flights, premium beverage selection
Lounge Access	Included at all SkyHorizon-operated lounges and partner lounges at destination airports
Priority Boarding	Included (Boarding Group 1), plus dedicated check-in and security fast-track where available
Cabin Baggage Allowance	1 cabin bag up to 10 kg, plus 1 personal item
Checked Baggage Allowance	2 pieces up to 32 kg each

3.4 First Class

First Class is offered exclusively aboard the Airbus A350-900 "Flagship" on the airline's premier ultra-long-haul routes, including Meridian City-London, Meridian City-New York, and Meridian City-Sydney.

Feature	Specification
Seat Width	27 inches, enclosed private suite with closing door
Seat Pitch (Legroom)	80 inches
Bed Length	78 inches, fully flat
Meals	À la carte, dine-on-demand fine dining service curated by SkyHorizon's culinary partners; dedicated cabin crew-to-passenger ratio of 1:4
Lounge Access	Included at SkyHorizon First Class Lounges (MDI, CBI) and premium partner First Class lounges at destination; Business Lounge access included where no First Class lounge exists
Priority Boarding	Included (Boarding Group 0), with dedicated check-in, immigration fast-track (where available), and chauffeur-drive transfer service at MDI and CBI
Cabin Baggage Allowance	2 cabin bags up to 10 kg each, plus 1 personal item
Checked Baggage Allowance	3 pieces up to 32 kg each

3.5 Class Comparison Summary

Feature	Economy	Premium Economy	Business	First
Seat Width	17.5 in	18.5 in	20-22 in	27 in (suite)
Pitch / Legroom	30-32 in	35-38 in	42-60 in	80 in
Bed Type	Upright recline	Deep recline + leg rest	Recliner / Lie-flat	Full flat bed, enclosed suite
Meal Service	Standard	Enhanced, 2 entrée choice	Multi-course, dine- on-demand	À la carte fine dining
Lounge Access	No	No (purchasable)	Yes	Yes (First Class lounge)
Priority Boarding	No	Yes	Yes	Yes (dedicated group)

Feature	Economy	Premium Economy	Business	First
Cabin Baggage	7 kg	10 kg	10 kg	10 kg x2
Checked Baggage	1 x 20–23 kg	1–2 x 25–30 kg	2 x 32 kg	3 x 32 kg
Aircraft Availability	All aircraft	A321neo (intl), A330, B787, A350	All aircraft	A350-900 only

3.6 Fare Families

Within Economy and Premium Economy, SkyHorizon offers three fare family options that determine flexibility, baggage allowance, and seat selection rights at the point of booking, independent of the cabin comfort features described above.

Fare Family	Cabin(s) Available	Seat Selection	Changes	Cancellation
Basic	Economy only	Not included (auto-assigned at check-in)	Not permitted	Non-refundable; taxes/fees only
Standard	Economy, Premium Economy	Included (standard seats)	Permitted with change fee plus fare difference	Travel credit, minus cancellation fee
Flex	Economy, Premium Economy	Included (any available seat, including extra-legroom)	Free changes, subject to fare difference	Full refund to original payment method

Business and First Class fares are sold as a single flexible fare family, with the refund and change terms described in Section 9.5 applied uniformly across all Business and First Class bookings.

\newpage

4. Passenger Services

4.1 Special Assistance

SkyHorizon Airways provides special assistance services to passengers with disabilities, reduced mobility, or other conditions requiring additional support. Requests for special assistance should be submitted at the time of booking or no later than 48 hours before scheduled departure, through the SkyHorizon website, contact centre, or travel agent.

Special assistance categories include:

- Mobility assistance (wheelchair, ambulatory, or stretcher cases)
- Visual or hearing impairment assistance
- Cognitive or developmental support needs
- Medical equipment and oxygen requirements
- Service animal accommodation (in accordance with applicable regulations of the departure, transit, and arrival states)

All SkyHorizon airport and cabin crew receive mandatory training in disability awareness and assistance procedures as part of initial and recurrent training.

4.2 Medical Support Services

Passengers with medical conditions that may affect their fitness to fly are required to submit a **Medical Information Form (MEDIF)**, completed by their treating physician, at least 72 hours before departure. This applies to passengers who:

- Have been hospitalized within 10 days of the flight.
- Have a condition that may be aggravated by flight (e.g., recent surgery, unstable cardiac or respiratory conditions, recent fractures).
- Require in-flight medical oxygen or other medical equipment.
- Are traveling specifically for the purpose of medical treatment.

The SkyHorizon Medical Desk reviews all MEDIF submissions and issues a fitness-to-fly clearance, which may include conditions such as requiring an attending escort, restricting travel to certain flight durations, or requiring medical equipment compatibility checks. Pregnant passengers are addressed separately under Section 4.6.

All SkyHorizon aircraft are equipped with an Emergency Medical Kit, an Automated External Defibrillator (AED), and a First Aid Kit. Cabin crew are trained in basic life support and emergency first aid as part of mandatory safety training (see Section 10.3).

4.3 Wheelchair Services

SkyHorizon provides complimentary wheelchair assistance from the airport entrance through to the aircraft seat, and on arrival from the aircraft seat to the airport exit or connecting gate. Three categories of wheelchair assistance are offered, coded per IATA Special Service Request (SSR) standards:

Passengers requiring wheelchair assistance should request this service at least 48 hours before departure to ensure availability, though SkyHorizon will make reasonable efforts to accommodate requests made at the airport, subject to resource availability. Personal wheelchairs are carried free of charge in the aircraft hold and are not counted against the passenger's checked baggage allowance.

4.4 Senior Citizen Services

Passengers aged 60 and above traveling on SkyHorizon flights are eligible for the following complimentary services upon request:

- Priority check-in at dedicated or fast-track counters where available.
- Priority boarding, regardless of cabin class booked.
- Assistance with baggage handling at check-in and baggage claim, upon request.
- Pre-allocated seating assistance to ensure proximity to a travelling companion, subject to availability.

Senior citizens travelling alone and requiring mobility or escort assistance should additionally register under the Special Assistance category described in Section 4.1.

4.5 Children Travelling Alone (Unaccompanied Minors)

Children travelling without an accompanying adult are categorized and handled under SkyHorizon's Unaccompanied Minor (UMNR) program.

Age Group	Policy
Below 5 years	Not permitted to travel unaccompanied under any circumstances
5-11 years	Must travel under the mandatory UMNR program
12-17 years	May travel under the UMNR program voluntarily, at the request of a parent or guardian

UMNR procedures include:

1. Booking must be made at least 48 hours in advance through the contact centre or a SkyHorizon airport ticket office (online UMNR booking is not permitted).
2. A completed UMNR form, including emergency contact details for both the departure and arrival ends of the journey, must be submitted by the parent or guardian.
3. The accompanying adult must remain at the departure airport until the flight has departed and must be present at the arrival airport (or designate an authorized adult, with identification verified) to receive the child.
4. A designated SkyHorizon ground staff member escorts the child through check-in, security (where permitted by airport regulations), boarding, and handover to cabin crew.
5. Cabin crew maintain direct supervision of UMNR passengers throughout the flight, including seating them in proximity to crew stations where feasible.
6. On arrival, ground staff escort the child to the designated receiving adult, verifying identification against the UMNR form before release.

SkyHorizon does not accept UMNR bookings on the final flight of the day on any route where a misconnection would require an overnight stay, except where a SkyHorizon-arranged adult chaperone service has been pre-booked.

4.6 Travel During Pregnancy

Stage of Pregnancy	Policy
Up to 27 weeks	May travel without medical certification
28–35 weeks	May travel with a medical certificate confirming fitness to fly, dated within 7 days of travel
36 weeks and beyond (single pregnancy) / 32 weeks and beyond (multiple pregnancy)	Not permitted to travel

Pregnant passengers between 28 and 35 weeks must carry a medical certificate stating the expected due date, confirmation of an uncomplicated pregnancy, and fitness to fly. SkyHorizon recommends that pregnant passengers consult their physician before booking travel, particularly for flights exceeding 4 hours in duration, and consider requesting an aisle or extra-legroom seat for comfort.

4.7 Pet Travel

SkyHorizon accepts the carriage of cats and dogs under two categories, subject to destination-country import regulations, which remain the sole responsibility of the passenger to verify in advance.

Category	Code	Description	Conditions
In-Cabin Pet	PETC	Small cats/dogs travelling in the cabin	Combined pet and carrier weight must not exceed 8 kg; carrier must fit under the seat in front; limited to 2 pets per cabin (booking required in advance)
Cargo Hold Pet	AVIH	Larger animals travelling in a pressurized, temperature-controlled hold compartment	IATA-compliant kennel required; advance booking and veterinary health certificate mandatory; not accepted when forecast ground temperature exceeds 30°C or falls below -5°C at any airport on the itinerary

Pet travel must be booked at least 72 hours in advance. Brachycephalic (snub-nosed) dog and cat breeds are not accepted for cargo hold travel due to elevated respiratory risk, but may be accepted in-cabin under PETC conditions where weight limits permit. Service animals accompanying passengers with disabilities are handled separately from standard pet travel and are not subject to pet carriage fees.

4.8 Sports Equipment Carriage

SkyHorizon accommodates the carriage of sports equipment as checked baggage, subject to size, weight, and packaging requirements.

Equipment Type	Handling
Golf bag	Accepted as part of standard checked baggage allowance if within weight limit; excess weight charged per excess baggage rates
Ski/snowboard equipment	Accepted in a single bag combining skis/board, boots, and poles, within standard weight limits
Bicycle	Must be packed in a hard case or bicycle box with handlebars turned and pedals removed; handled as 1 piece of checked baggage
Surfboard/windsurfing equipment	Accepted up to 2.5 metres in length; oversized item charges apply beyond standard dimensions
Diving equipment	Tanks must be carried empty and valve-open to certify the absence of pressurized gas

All sports equipment must be declared at the time of booking or check-in. Equipment exceeding standard size and weight allowances is subject to oversized and excess baggage charges per the published SkyHorizon baggage fee schedule.

4.9 Infant Travel

Infants under 2 years of age may travel on an adult's lap at a reduced fare (typically 10% of the applicable adult fare, plus taxes), or on a separately purchased seat with a child safety seat, at the applicable child fare.

Provision	Detail
Minimum age for travel	7 days (domestic); 14 days (international), subject to medical fitness
Infants per adult	Maximum 1 infant per adult on lap; a second infant requires a separately ticketed seat
Bassinet availability	Available on wide-body aircraft (A330-300, B787-9, A350-900) on request, subject to aircraft configuration and seat location; limited quantity per flight
Baggage allowance	1 collapsible stroller or car seat carried free of charge, in addition to the accompanying adult's baggage allowance
Meals	Baby food and formula may be carried in cabin baggage in reasonable quantities for the flight duration, exempt from standard liquid restrictions after additional screening

Bassinet requests and child safety seat use should be confirmed at the time of booking, as both are subject to availability and certain seat row restrictions (bassinet cannot be fitted at emergency exit rows).

\newpage

5. Check-in Procedures

5.1 Online Check-in

Online check-in is available through the SkyHorizon website and mobile application, opening **48 hours before** scheduled departure and closing **2 hours before** scheduled departure for international flights, and **1 hour before** scheduled departure for domestic flights.

Online check-in features include:

- Seat selection (subject to fare class restrictions and seat availability).
- Addition of pre-paid checked baggage and special meal requests.
- Mobile boarding pass issuance, compatible with digital wallet applications.
- Passport and visa information capture for international itineraries, validated against destination entry requirements through SkyHorizon's Advance Passenger Information (API) system.

Passengers who complete online check-in but are carrying checked baggage must still visit a **Bag Drop** counter at the airport, which closes 45 minutes (domestic) or 60 minutes (international) before departure.

5.2 Airport Check-in Counters

Staffed check-in counters are available at all SkyHorizon stations for passengers who have not completed online check-in, require special assistance, or are travelling with infants, pets, or special baggage.

Counter Type	Availability
Standard Check-in	All passengers; opens 3 hours before international departure, 2 hours before domestic departure
Priority Check-in	Business and First Class passengers, senior citizens, and SkyHorizon frequent flyer Gold/Platinum tier members
Bag Drop	Passengers who completed online check-in but require checked baggage processing

Standard check-in counters close 60 minutes before international departure and 45 minutes before domestic departure. Passengers arriving after counter closure may be denied check-in (see Section 6.4 on missed boarding procedures).

5.3 Self-Service Kiosks

Self-service kiosks are available at MDI, CBI, and HGA, and at major outstations, allowing passengers to:

- Check in and print or send a boarding pass to their mobile device.
- Print baggage tags for self-tagging, where the station operates a self-tag bag drop process.
- Make limited seat changes within the same cabin class.
- Retrieve a duplicate boarding pass in case of a lost or damaged copy.

Kiosk check-in is available within the same time windows as online check-in and closes at the same cut-off times as standard check-in counters.

5.4 Boarding Pass Rules

A valid boarding pass, whether printed, mobile, or kiosk-issued, must display the following information to be accepted at the boarding gate: passenger full name matching the travel document, flight number, date of travel, boarding group, seat number (or "standby" status), and departure gate.

Boarding pass rules:

- Boarding passes are non-transferable; the named passenger must be the one presenting it.
- A mobile boarding pass must be displayed on a charged device with screen brightness sufficient for the barcode/QR code to be scanned.
- Passengers connecting between two SkyHorizon flights on a single itinerary will generally be issued both boarding passes at the originating check-in, except where the connection involves a change of immigration status (e.g., domestic-to-international connections in certain jurisdictions), in which case the second boarding pass is issued at a transfer desk.
- A boarding pass without a confirmed seat number is only valid for boarding once a seat has been allocated at the gate.

5.5 Identity Verification

All passengers must present a valid government-issued photo identification document matching the name on their booking and boarding pass.

Travel Type	Accepted Identification
Domestic	National ID card, passport, or driving licence with photo
International	Valid passport with a minimum of 6 months' validity remaining beyond the intended date of return, plus any visa or entry permit required by the destination or transit country

Identity is verified at three points: check-in (document scan and name match), security screening (boarding pass and ID cross-check), and boarding gate (final boarding pass and, on international flights, passport check against the manifest). SkyHorizon's check-in systems are integrated with Advance Passenger Information (API) and Interactive API (iAPI) systems required by certain destination countries, which may result in denial of boarding if a passenger's travel document does not clear pre-screening.

5.6 Security Screening Process

Security screening at SkyHorizon stations is conducted by the airport authority or its designated security agency, in accordance with national and international aviation security regulations. SkyHorizon ground staff coordinate with airport security to ensure smooth passenger flow, particularly for passengers requiring special assistance, families with infants, or connecting passengers with tight transfer times.

Standard screening process:

1. Boarding pass and identification check at the security screening point entrance.
2. X-ray screening of cabin baggage and personal items.

3. Walk-through or body scanner screening of passengers, with manual pat-down screening available on request or as required.
4. Removal of laptops, large electronic devices, and liquids/gels/aerosols (in containers exceeding permitted limits) from cabin baggage for separate screening, per departure airport regulations.
5. Secondary screening (additional manual inspection) where an anomaly is detected.

Passengers connecting through MDI, CBI, or HGA from another SkyHorizon flight without leaving the secure area of the terminal are not required to undergo repeat screening, unless directed otherwise by airport security authorities.

\newpage

6. Boarding Process

6.1 Boarding Groups

SkyHorizon boards passengers in structured groups to ensure an efficient and orderly process, displayed on the boarding pass and announced at the gate.

Boarding Group	Passenger Category
Group 0	First Class, passengers requiring extra time/assistance (wheelchair, unaccompanied minors)
Group 1	Business Class, SkyHorizon frequent flyer Platinum and Gold tier members
Group 2	Premium Economy, SkyHorizon frequent flyer Silver tier members
Group 3	Economy – rear cabin zone (window/middle seats)
Group 4	Economy – rear cabin zone (aisle seats) and forward cabin zone (window/middle seats)
Group 5	Economy – remaining passengers and any standby passengers cleared for travel

Families travelling with children under 5 years of age may board with Group 0 regardless of cabin class, upon request at the gate.

6.2 Gate Timings

Flight Type	Gate Opens	Boarding Begins	Gate Closes
Domestic	45 minutes before departure	30 minutes before departure	15 minutes before departure

Flight Type	Gate Opens	Boarding Begins	Gate Closes
International (narrow-body)	60 minutes before departure	40 minutes before departure	20 minutes before departure
International (wide-body, long-haul)	75 minutes before departure	50 minutes before departure	25 minutes before departure

Gate timings may be adjusted by the Station Manager in cases of delay, aircraft change, or remote stand operations requiring bus transfer, in which case boarding typically begins earlier to accommodate the additional transfer time.

6.3 Final Boarding Call

A final boarding call is announced over the terminal public address system and, where available, sent via SMS/app notification to passengers who have not yet presented themselves at the gate, beginning 15 minutes before gate closure for international flights and 10 minutes before gate closure for domestic flights. Ground staff will attempt to page passengers by name for the final boarding call on flights closing within 10 minutes if the passenger has checked in but not yet boarded.

Passengers who have checked in baggage but fail to board by gate closure will have their checked baggage offloaded before departure, in compliance with mandatory passenger-baggage reconciliation requirements designed to prevent any bag from travelling on a flight without its owner.

6.4 Missed Boarding Procedures

A passenger is considered to have **missed the flight** if they fail to reach the boarding gate before gate closure, regardless of the reason (late arrival at the airport, delay at security, or any other cause attributable to the passenger).

Procedure for missed boarding:

1. The gate agent marks the passenger as a "no-show" or "gate no-show" depending on whether they checked in.
2. Checked baggage, if any, is identified and offloaded per the reconciliation process.
3. The passenger is directed to the SkyHorizon airport ticket desk or contact centre to discuss rebooking options.
4. Rebooking eligibility and any applicable rebooking fee depend on the fare type purchased:

Passengers who miss a flight due to a delay on a **connecting SkyHorizon flight** are rebooked at no charge on the next available service, and are entitled to the disruption support described in Section 8.1, regardless of fare type.

\newpage

7. Airport Guidelines

7.1 Security Procedures

All passengers, baggage, and cargo are subject to the security regulations of the departure airport's national aviation security authority. SkyHorizon requires all passengers to:

- Arrive at the airport within the recommended check-in window (see Sections 5.1 and 5.2).
- Comply with security screening instructions, including the removal of outer garments, footwear (where directed), and electronic devices for screening.
- Refrain from carrying prohibited items as outlined in Section 7.4.
- Cooperate with random secondary screening, which may be applied to any passenger regardless of cabin class or status.

SkyHorizon reserves the right to deny boarding to any passenger who refuses to comply with mandatory security screening procedures.

7.2 Immigration Procedures

For international travel, passengers must clear immigration formalities at both departure (in some jurisdictions) and arrival. SkyHorizon ground staff at international stations provide guidance on:

- Completion of arrival/departure cards where still required by the destination country.
- Location and accessibility of automated immigration gates (e-gates) for eligible passport holders.
- Connection assistance for passengers transiting through a hub where immigration clearance is required before reaching the connecting gate (this applies at certain SkyHorizon hub airports depending on the passenger's nationality and itinerary).

Passengers are responsible for ensuring they hold valid visas or entry permits for their destination and any transit country where immigration clearance is required. SkyHorizon's check-in staff perform a documentary check but the final responsibility for compliance with entry requirements rests with the passenger.

7.3 Customs Regulations

Passengers must comply with the customs regulations of the country of arrival, including declaration requirements for currency, goods, food items, and dutiable items. SkyHorizon provides the following guidance to passengers:

- Customs declaration forms, where required, are distributed onboard arriving international flights by cabin crew.
- Passengers carrying restricted goods (e.g., agricultural products, large amounts of currency, commercial samples) must declare these at the arrival customs checkpoint.
- SkyHorizon is not responsible for the seizure, confiscation, or destruction of any goods found to be in breach of the arrival country's customs regulations.

7.4 Restricted and Prohibited Items

Items are categorized into those prohibited entirely, those restricted to checked baggage only, and those subject to quantity limits.

Category	Examples	Cabin Baggage	Checked Baggage
Sharp objects	Knives, scissors over 6 cm, razor blades (loose)	Not permitted	Permitted
Liquids, gels, aerosols	Toiletries, beverages	Permitted only in containers of 100 ml or less, within a single transparent resealable bag	Permitted in normal retail quantities
Sporting goods	Bats, clubs, hockey sticks	Not permitted	Permitted
Lithium batteries (spare, uninstalled)	Power banks, spare camera batteries	Permitted up to 100Wh without restriction; 100–160Wh with airline approval; not permitted above 160Wh	Not permitted (must be carried in cabin)
Flammable items	Lighters (other than 1 small lighter on person), fuel, matches in bulk	Not permitted	Not permitted
Firearms and weapons	Guns, ammunition, replica weapons	Not permitted	Permitted only if declared, unloaded, and transported per applicable firearms regulations
Explosives and corrosives	Fireworks, acids, bleach	Not permitted	Not permitted

This table is illustrative; full restricted items guidance is published in the SkyHorizon Dangerous Goods and Security Items Policy, which takes precedence in case of any discrepancy.

7.5 Duty-Free Shopping

Passengers travelling on international SkyHorizon flights may purchase duty-free goods at airport retail outlets after security/immigration clearance, or onboard selected long-haul flights through the SkyHorizon SkyShop in-flight catalogue.

Guidelines for duty-free purchases:

- Liquids purchased in duty-free zones after security screening are typically exempt from the 100 ml cabin liquid restriction, provided they remain in a security-tamper-evident bag (STEB) with the purchase receipt visible, and the connecting itinerary does not require re-screening at a transit point with different regulations.
- Passengers connecting through a third country should verify whether local regulations permit onward carriage of STEB-sealed duty-free liquids, as rules vary by jurisdiction.
- Duty-free purchases are subject to the destination country's personal import allowances; amounts exceeding these allowances must be declared to customs on arrival.

7.6 Currency and Valuables Declaration

Most jurisdictions served by SkyHorizon require formal declaration of cash or monetary instruments carried above a specified threshold, commonly equivalent to USD 10,000 or the local currency equivalent. SkyHorizon advises passengers to:

- Check the specific currency declaration threshold of their departure, transit, and arrival countries before travel, as thresholds and reporting forms vary by jurisdiction.
- Declare currency, traveller's cheques, or negotiable monetary instruments above the threshold to customs authorities at departure and arrival, as required.
- Retain proof of legitimate source of funds where large amounts of currency are being carried, as failure to declare can result in seizure and penalties under local law, for which SkyHorizon bears no liability.

7.7 Transit and Transfer Passenger Guidelines

Passengers transiting through MDI, CBI, or HGA en route to a connecting SkyHorizon or partner flight should note the following:

- **Airside transit** (remaining within the secure area of the terminal) generally does not require immigration clearance, except for passengers whose nationality requires a transit visa for the country of transit — this requirement varies by nationality and should be checked prior to booking.
- **Landside transfer** (where a passenger must collect baggage, clear immigration, and re-check in for a connecting flight, typically applicable when changing between certain international and domestic connections) requires sufficient connection time as outlined in Section 1.8.
- Transfer desks are located in the international transit area at MDI and CBI to assist passengers with rebooking, baggage queries, or short-connection re-routing.

8. Flight Operations

8.1 Flight Delays

SkyHorizon classifies delays by cause and applies a corresponding passenger support standard.

Delay Cause	Examples	Passenger Support Provided
Airline-caused	Technical fault, crew scheduling issue, late inbound aircraft	Meal/refreshment vouchers (delays over 2 hours), hotel accommodation and transfers (overnight delays), rebooking at no charge
Air Traffic Control / Airport	ATC slot restrictions, runway closure, airport congestion	Meal/refreshment vouchers (delays over 3 hours); rebooking assistance
Weather	Storms, fog, volcanic ash, typhoon	Rebooking assistance at no charge; accommodation support assessed case-by-case per Section 8.4
Security	Security alerts, airspace closures	Rebooking assistance; accommodation support assessed case-by-case

Delay communication standards:

- Passengers are notified of delays exceeding 30 minutes via the app, SMS, or email where contact details have been provided.
- Gate announcements are made at intervals of no more than 30 minutes during a delay once the passenger is at the airport.
- The Station Manager authorizes the issuance of meal and accommodation vouchers based on the delay classification table above.

8.2 Flight Diversions

A diversion occurs when a flight lands at an airport other than its scheduled destination, typically due to weather, a medical emergency, a technical issue, or insufficient fuel to continue holding for the original destination.

Diversion handling procedure:

1. The flight crew notifies the Operations Control Centre (OCC) of the diversion as early as possible.
2. The OCC activates ground handling arrangements at the diversion airport, including passenger disembarkation, refuelling, and crew duty time assessment.
3. If the aircraft can safely and legally continue to the original destination after addressing the cause of diversion (e.g., refuelling, medical offload), it does so once

cleared.

4. If continuation is not possible (e.g., crew duty time expired, technical issue requires maintenance), SkyHorizon arranges ground transportation, accommodation if required, and rebooking via the most practical means, which may include coach transfer, a replacement aircraft, or rebooking onto another carrier.
5. Passengers are kept informed by the cabin crew and, after disembarkation, by SkyHorizon ground representatives dispatched to or already present at the diversion airport.

8.3 Emergency Procedures

SkyHorizon's Emergency Response Plan (ERP) governs the airline's response to any accident, serious incident, or significant operational emergency. Key components include:

- **Emergency Operations Centre (EOC):** Activated at SkyHorizon headquarters to coordinate the airline-wide response, including regulatory notification, family assistance, and media communication.
- **Go-Team:** A trained team dispatched to the location of a serious incident to support local authorities, provide family assistance, and manage on-site coordination.
- **Family Assistance Programme:** Provides a dedicated point of contact, travel and accommodation support, and counselling referrals for passengers and crew involved in a serious incident, and for their families.
- **Regulatory Notification:** Immediate notification to the Meridia Civil Aviation Authority (MCAA) and other relevant authorities in accordance with mandatory occurrence reporting requirements.

All SkyHorizon flight and cabin crew undergo mandatory emergency procedures training during initial training and at recurrent intervals not exceeding 12 months (see Section 10.3).

8.4 Weather-Related Disruptions

Weather is the leading cause of schedule disruption across the SkyHorizon network. The airline applies the following standard practices during significant weather events (typhoons, severe thunderstorms, fog, snow/ice):

- **Proactive Cancellation:** For forecast severe weather events known at least 24 hours in advance, SkyHorizon may proactively cancel flights to avoid last-minute disruption, notifying affected passengers as early as possible with rebooking options.
- **De-icing Operations:** At stations subject to winter weather, aircraft are de-iced/anti-iced per approved holdover time tables before departure; this may extend ground time and is factored into the published schedule during winter operating season.
- **Waiver Policy:** During declared severe weather events, SkyHorizon issues a fee waiver allowing affected passengers to rebook or alter their itinerary without a change fee, for travel within a defined window before and after the event.
- **Ground Stop Coordination:** When an airport authority or air traffic control issues a ground stop, the OCC manages the resulting queue of affected SkyHorizon flights and

communicates revised departure sequencing to affected stations.

8.5 Aircraft Maintenance Protocols

SkyHorizon's fleet is maintained under a Continuing Airworthiness Maintenance Programme (CAMP) approved by the Meridia Civil Aviation Authority, structured across four maintenance check levels:

Check Level	Frequency (approximate)	Scope
Transit / Pre-flight Check	Before each flight	Visual inspection, fluid levels, tyre condition, general walk-around
A Check	Every 400–600 flight hours	Detailed inspection of systems, lubrication, minor component replacement
C Check	Every 20–24 months	Extensive inspection of airframe, systems, and structure; aircraft out of service 1–2 weeks
D Check (Heavy Check)	Every 6–10 years	Complete structural inspection and overhaul; aircraft out of service several weeks

Any defect identified during a pre-flight or transit check is assessed against the aircraft's Minimum Equipment List (MEL); the aircraft may only be dispatched if the defect is permitted under MEL conditions, with rectification scheduled within the MEL-specified interval. No SkyHorizon aircraft is dispatched with an outstanding defect that falls outside MEL allowances.

8.6 Irregular Operations Communication Protocol

During any disruption event (delay, diversion, cancellation, or emergency), SkyHorizon follows a structured communication protocol to keep passengers, crew, and stations informed:

1. **Detection:** The Operations Control Centre (OCC) identifies the disruption and classifies its cause and expected duration.
2. **Internal Notification:** Affected stations, crew scheduling, and the Customer Experience Department are notified simultaneously through the OCC's Irregular Operations (IROPS) dashboard.
3. **Passenger Notification:** Automated SMS, email, and app push notifications are triggered for all passengers on the affected flight(s), followed by gate announcements for passengers already at the airport.
4. **Rebooking Activation:** For cancellations, the booking system automatically generates rebooking options on the next available SkyHorizon flight(s), which passengers may accept via the app or through the contact centre.

5. **Resolution Tracking:** The OCC tracks the disruption to resolution and issues a post-event report to the Safety and Customer Experience Departments for review.

This protocol is designed so that no passenger affected by a schedule change is left without rebooking options or a clear point of contact for further assistance.

\newpage

9. Customer Support

9.1 Contact Channels

SkyHorizon Airways provides multiple channels through which passengers can seek support, make bookings, or raise concerns.

Channel	Availability	Best Used For
SkyHorizon Contact Centre (phone)	24 hours / 7 days	Urgent issues, rebooking, special service requests
Live Chat (website and app)	24 hours / 7 days	General queries, booking changes, baggage tracking
Email Support	Response within 48 hours	Non-urgent queries, documentation submission
Airport Customer Service Desks	During airport operating hours	In-person issues, lost baggage, denied boarding compensation
Social Media Support (verified accounts)	07:00–23:00 daily	General queries, public feedback (escalated privately for resolution)
SkyHorizon Mobile App	24 hours / 7 days	Self-service rebooking, refund requests, flight status, e-boarding pass

Business and First Class passengers, and SkyHorizon frequent flyer Platinum/Gold tier members, have access to a dedicated priority contact centre line with a target answer time of under 60 seconds.

9.2 Complaint Resolution Process

SkyHorizon operates a structured complaint-handling process to ensure consistent and timely resolution.

1. **Submission:** Complaint is received via any contact channel and logged in the SkyHorizon Customer Relations Management (CRM) system with a unique case reference number.

2. **Acknowledgement:** An acknowledgement is sent to the passenger within 24 hours, including the case reference number.
3. **Investigation:** The Customer Relations team investigates the complaint, which may include reviewing flight records, crew reports, baggage records, or station incident reports.
4. **Resolution:** A resolution (explanation, apology, goodwill gesture, compensation, or refund, as applicable) is issued. Standard target resolution time is 14 days for straightforward complaints and up to 30 days for complaints requiring detailed investigation (e.g., baggage damage assessment, denied boarding compensation calculation).
5. **Escalation:** If a passenger is not satisfied with the resolution, the case may be escalated to a Senior Customer Relations Officer, and subsequently to the Customer Experience Department Head if still unresolved.
6. **External Escalation:** Where applicable, passengers retain the right to escalate unresolved complaints to the Meridia Civil Aviation Authority's Consumer Protection Office or other applicable regulatory body.

9.3 Feedback Handling

SkyHorizon actively collects passenger feedback through post-flight satisfaction surveys, in-app feedback prompts, and direct submissions. Feedback is categorized as:

- **Compliments** – Logged and shared with the relevant station, crew, or department for recognition purposes.
- **Suggestions** – Reviewed quarterly by the Customer Experience Department and considered in service design and process improvement initiatives.
- **Complaints** – Routed into the formal Complaint Resolution Process described in Section 9.2.

All feedback, regardless of category, contributes to SkyHorizon's quarterly Net Promoter Score (NPS) and service quality reporting reviewed by the executive leadership team.

9.4 Lost and Damaged Baggage Support

Baggage irregularities are classified into three categories: delayed, damaged, and lost.

Category	Definition	SkyHorizon Action
Delayed Baggage	Bag does not arrive on the same flight as the passenger	Passenger files a Property Irregularity Report (PIR) at the arrival airport; interim expense allowance provided for essential items; bag is traced and forwarded once located, typically within 3–5 days
Damaged Baggage	Bag arrives with damage beyond normal wear and tear	Passenger files a PIR within 7 days of travel; damage assessed and repair, replacement, or compensation offered per SkyHorizon's liability policy
Lost Baggage	Bag not located within 21 days of the PIR filing	Bag is formally declared lost; compensation is calculated per the applicable liability convention (e.g., Montreal Convention limits for international travel) based on weight and declared value, subject to documentation

Passengers are strongly advised to retain baggage tags and receipts for valuable items, and to ensure any high-value items are declared or carried in cabin baggage, as SkyHorizon's liability for unreported high-value items in checked baggage is limited per the applicable liability framework.

9.5 Refund and Cancellation Support

Refund eligibility depends on fare type and the reason for cancellation.

Scenario	Refund Policy
Passenger-initiated cancellation – Flexible/Business/First fare	Full refund to original payment method, minus any applicable service fee
Passenger-initiated cancellation – Standard Economy fare	Refund of unused taxes and fees; fare amount refunded as travel credit, minus cancellation fee
Passenger-initiated cancellation – Basic/Restricted fare	Non-refundable; only government taxes and airport fees refunded
Airline-initiated cancellation (flight cancelled by SkyHorizon)	Full refund to original payment method, or free rebooking, at the passenger's choice — regardless of fare type
Denied boarding due to overbooking	Full refund or rebooking, plus denied boarding compensation per the applicable regulatory framework

Refund requests are processed within 7 business days for credit/debit card payments and up to 14 business days for other payment methods, measured from the date the refund

request is approved.

\newpage

10. Safety Policies

10.1 Passenger Safety Responsibilities

While SkyHorizon bears primary responsibility for safe operation of the aircraft, passengers share responsibility for a safe cabin environment. Passengers are required to:

- Fasten seatbelts whenever the seatbelt sign is illuminated, and whenever instructed by crew.
- Stow cabin baggage securely in the overhead bin or under the seat in front, ensuring aisles and emergency exit paths remain clear.
- Switch portable electronic devices to flight mode (or power off, where instructed) and comply with crew instructions regarding device use during critical phases of flight.
- Refrain from tampering with, disabling, or obstructing any smoke detector, safety equipment, or emergency exit.
- Pay attention to the safety demonstration and review the safety information card located in the seat pocket.
- Follow crew instructions immediately and without argument during any safety-related event, including turbulence, emergency descent, or evacuation.

10.2 Cabin Safety Standards

SkyHorizon maintains the following cabin safety standards across its fleet:

- All cabin crew are trained and certified on the specific aircraft type(s) they operate, including emergency equipment location, operation, and evacuation procedures.
- Minimum cabin crew complement is determined by the regulatory requirement of 1 crew member per 50 passenger seats, with SkyHorizon's standard crew complement meeting or exceeding this minimum on all aircraft types.
- All aircraft carry safety equipment including life vests (for flights with extended overwater segments), emergency locator transmitters, fire extinguishers, smoke hoods for crew, first aid kits, and an Emergency Medical Kit.
- Cabin crew conduct a safety equipment and security check before every departure, including verification of emergency exit functionality, escape slide/raft armed status, and emergency lighting.
- Random and scheduled safety audits are conducted by the Corporate Safety Division across all bases, with findings tracked through a Corrective Action Plan.

10.3 Crew Responsibilities

Crew Role	Key Safety Responsibilities
Captain (Pilot-in-Command)	Final authority on all matters affecting the safety of the flight; responsible for go/no-go decisions, emergency declarations, and overall crew coordination
First Officer	Supports the Captain in flight operations, monitors systems, and is qualified to assume command duties if required
Cabin Crew (Senior/Lead)	Coordinates cabin crew team, liaises with flight deck, oversees passenger safety compliance and emergency response coordination in the cabin
Cabin Crew (Crew Member)	Conducts safety demonstrations, monitors passenger compliance, manages emergency equipment, and leads evacuation procedures at assigned exits

All flight and cabin crew undergo recurrent safety training at intervals not exceeding 12 months, covering emergency evacuation drills, firefighting, first aid and CPR/AED use, security threat response, and crew resource management (CRM).

10.4 Emergency Exits and Evacuation

Each SkyHorizon aircraft type has a defined number and location of emergency exits, certified to allow full passenger evacuation within 90 seconds under regulatory demonstration conditions, using only half of the available exits (simulating a scenario where some exits are blocked).

Passengers seated in emergency exit rows are subject to additional requirements:

- Must be at least 15 years of age.
- Must be physically able to operate the emergency exit and assist others in evacuation.
- Must understand and be able to follow crew instructions in the language used for safety briefings.
- Are briefed individually by cabin crew on exit operation before departure.

Passengers who do not meet exit row eligibility criteria, or who decline the responsibility, are resealed by cabin crew before departure.

10.5 Safety Demonstrations

A safety demonstration is conducted by cabin crew before every departure, covering:

- Seatbelt fastening and unfastening.
- Location and use of life vests (on applicable flights).
- Location of emergency exits nearest to the passenger's seat.
- Brace position and emergency descent procedures.

- Oxygen mask deployment and use.
- Prohibition on smoking, including electronic cigarettes, throughout the flight.

The demonstration is delivered live by cabin crew or via a pre-recorded video shown on individual or overhead screens, supplemented by the safety information card in each seat pocket, which passengers are required to review regardless of how frequently they fly.

10.6 Crew Training and Certification

All SkyHorizon flight and cabin crew complete a structured training pathway before operating revenue flights, and ongoing recurrent training throughout their career.

Training Stage	Flight Crew	Cabin Crew
Initial Training	Type rating course (4-8 weeks depending on aircraft type), simulator training, line training under supervision	6-week initial course covering safety, service, first aid, and security; supervised line flights before sign-off
Recurrent Training	Annual simulator check (emergency procedures, CRM), medical certificate renewal per regulatory interval	Annual safety and emergency procedures refresher, including evacuation drills and firefighting practical exercises
Specialized Training	Route/airport qualification for challenging airports, augmented crew procedures for ultra-long-haul	UMNR handling, special assistance, conflict de-escalation, dangerous goods recognition
Promotion Training	Command upgrade course (First Officer to Captain), including additional CRM and leadership modules	Senior/Lead Cabin Crew course covering crew supervision and emergency command responsibilities

Training records for every crew member are maintained in the SkyHorizon Training Management System and audited by the Corporate Safety Division to confirm currency before any crew member is rostered for flight duty.

\newpage

11. Code of Conduct

11.1 Passenger Behaviour Standards

SkyHorizon expects all passengers to conduct themselves in a manner that respects the safety, comfort, and dignity of fellow passengers and crew. Passengers are expected to:

- Comply promptly with crew instructions at all times.
- Treat crew, ground staff, and fellow passengers with courtesy and respect.
- Maintain reasonable standards of personal conduct, including with respect to noise level, use of shared space (such as armrests and overhead bins), and seat recline etiquette.
- Supervise children travelling with them to ensure they do not disturb other passengers or compromise cabin safety.
- Refrain from consuming personal alcohol brought onboard; only alcohol served by cabin crew may be consumed during the flight.

11.2 Prohibited Activities Onboard

The following activities are strictly prohibited on all SkyHorizon flights and may result in restraint, offloading, denial of further travel, and referral to law enforcement:

- Smoking or vaping anywhere on the aircraft, including in lavatories, at any time during the flight.
- Tampering with smoke detectors or any safety equipment.
- Verbal abuse, threats, or physical aggression directed at crew or other passengers.
- Interference with crew members in the performance of their duties.
- Use of unauthorized electronic devices that have not been switched to flight mode during phases of flight where this is required.
- Consumption of personal alcohol not served by cabin crew.
- Any act that endangers the safety of the aircraft, its occupants, or property.

SkyHorizon maintains a zero-tolerance policy toward unruly passenger behaviour. Incidents are documented by the crew in an Onboard Incident Report, and SkyHorizon reserves the right to pursue civil recovery of costs (including diversion costs) and to report the passenger to relevant authorities and the Meridia Civil Aviation Authority's unruly passenger registry, where such a mechanism exists.

11.3 Airline Responsibilities and Commitments

In return for passenger compliance with the standards above, SkyHorizon commits to:

- Operating every flight to the highest standard of safety, without compromise for commercial reasons.
- Treating every passenger fairly and consistently, regardless of fare class, nationality, or status.
- Communicating proactively and honestly during disruptions, including the reason for delay where known.
- Providing reasonable accommodation for passengers with disabilities, medical needs, or other special circumstances, as detailed in Section 4.

- Handling complaints and feedback through a transparent, time-bound process, as detailed in Section 9.
- Continuously training crew and staff to uphold both the safety and service standards described throughout this manual.

11.4 Refusal of Carriage and Repeat Offender Management

SkyHorizon reserves the right to refuse carriage to any passenger where reasonably necessary for the safety of the flight, the comfort of other passengers, or compliance with applicable law, including but not limited to passengers who:

- Have previously engaged in unruly or disruptive behaviour on a SkyHorizon flight and have not provided satisfactory assurance of acceptable conduct.
- Appear to be under the influence of alcohol or drugs to a degree that may affect the safety or comfort of the flight.
- Are subject to a valid travel ban, court order, or no-fly listing applicable in the relevant jurisdiction.
- Refuse to comply with security, safety, or identity verification procedures.

Incidents of unruly behaviour are recorded in the SkyHorizon Passenger Conduct Register. A passenger recorded for a serious incident (Level 2 or above, involving physical aggression, crew interference, or safety equipment tampering) is subject to a carriage review by the Customer Experience and Corporate Safety Divisions before being permitted to book future travel with SkyHorizon, and may be placed on a temporary or indefinite restricted carriage list.

12. Glossary of Airline Terminology

Term	Definition
AOC (Air Operator's Certificate)	The certificate issued by a civil aviation authority authorizing an airline to conduct commercial air transport operations.
API / iAPI (Advance/Interactive Passenger Information)	Systems used to transmit passenger data to destination country authorities before travel, used for border security and entry clearance.
AVIH	IATA service code for an animal travelling in the cargo hold.
Block Time	The total time from when an aircraft's parking brake is released for departure to when it is set on arrival.
Bag Drop	A counter where passengers who have already checked in online deposit their checked baggage.

Term	Definition
CAMP (Continuing Airworthiness Maintenance Programme)	The structured maintenance schedule an airline follows to keep its aircraft airworthy throughout their operational life.
Codeshare	An arrangement where a flight is marketed and sold by one airline but operated by another.
CRM (Crew Resource Management)	Training methodology focused on effective communication, teamwork, and decision-making among flight and cabin crew.
Denied Boarding	When a passenger holding a valid, confirmed reservation is not permitted to board, typically due to overbooking.
Diversion	The landing of an aircraft at an airport other than its originally scheduled destination.
FOD (Foreign Object Debris)	Any object found in an inappropriate location (e.g., on a runway or ramp) that could cause damage to an aircraft.
GDS (Global Distribution System)	A computerized network used by travel agents and booking platforms to access airline fare and inventory data.
Ground Handling	All services provided to an aircraft and its passengers and cargo while on the ground, including baggage, cleaning, catering, and pushback.
Hub-and-Spoke	A network model where flights are routed through a central hub airport rather than flying directly between all city pairs.
IATA	International Air Transport Association, the global trade association of airlines that sets many commercial and operational standards.
ICAO	International Civil Aviation Organization, the United Nations agency that sets international standards for aviation safety and operations.
Load Factor	The percentage of available seating capacity that is filled with paying passengers on a given flight.
MEL (Minimum Equipment List)	A list defining equipment that may be inoperative while still permitting an aircraft to be dispatched safely, under specified conditions.
MEDIF (Medical Information Form)	A form completed by a passenger's physician to assess fitness to fly for passengers with medical conditions.

Term	Definition
MRO (Maintenance, Repair, and Overhaul)	A facility or organization that performs maintenance, repair, and overhaul work on aircraft.
NPS (Net Promoter Score)	A customer loyalty and satisfaction metric based on the likelihood of a customer recommending a service to others.
OCC (Operations Control Centre)	The centralized unit that monitors and manages an airline's day-of-operations activities, including disruption response.
Overbooking	The practice of selling more tickets for a flight than there are physical seats, based on statistical no-show predictions.
PETC	IATA service code for a small pet travelling in the aircraft cabin.
PIR (Property Irregularity Report)	A report filed by a passenger to document delayed, damaged, or lost baggage.
Pushback	The process of an aircraft being towed backward away from the gate by a tow tractor before taxiing under its own power.
Rotation	The sequence of flights flown by a single aircraft (by tail number) over a given period, often a day.
Slot	An authorization for an aircraft to use the full range of airport infrastructure for landing or takeoff on a specific date and time.
SSR (Special Service Request)	A coded request attached to a passenger's booking indicating a special need, such as wheelchair assistance or a special meal.
STEB (Security Tamper-Evident Bag)	A sealed bag used to carry duty-free liquids purchased after security screening, allowing them past liquid restriction checks.
Turnaround	The complete process of preparing an aircraft for its next flight after arrival, including disembarkation, cleaning, catering, and boarding.
UMNR (Unaccompanied Minor)	A child travelling without an accompanying adult, handled under a structured airline escort program.
WCHC / WCHR / WCHS	IATA wheelchair service codes indicating the level of mobility assistance a passenger requires (cabin seat, ramp, or steps assistance respectively).

Term	Definition
AED (Automated External Defibrillator)	A portable device carried onboard to deliver an electric shock to restore normal heart rhythm during a cardiac emergency.
Aerobridge	The enclosed, extendable bridge connecting an airport terminal gate directly to an aircraft door, used for passenger boarding and disembarkation.
Ambulatory	Describes a passenger who is able to walk independently, used in the context of assessing mobility assistance needs.
Augmented Crew	A flight crew complement larger than the minimum required, typically three or four pilots, used on long-haul flights to allow in-flight rest.
Brace Position	A protective body position adopted by passengers immediately before an emergency landing to reduce injury risk.
Connection Time (Minimum Connecting Time / MCT)	The minimum time required between a passenger's arriving and departing flights at a given airport to allow for transfer formalities.
Fare Family	A bundled set of booking conditions (flexibility, baggage, seat selection) attached to a fare, distinct from the cabin class itself.
Flight Duty Period (FDP)	The total time a crew member is rostered for duty, from reporting for a flight to the end of the final flight in that duty period.
Holdover Time	The estimated time that de-icing/anti-icing fluid will protect an aircraft surface from the formation of frost or ice before departure.
Interline Baggage Agreement	An agreement between two airlines allowing a passenger's checked baggage to be transferred automatically between connecting flights on different carriers.
No-Show	A passenger holding a confirmed reservation who does not check in or present for boarding without prior cancellation.
Pairing	A sequence of flights assigned to a single crew member or crew team, beginning and ending at their home base.
Ramp	The paved area of an airport used for aircraft parking, loading, fuelling, and other ground servicing activities, also called the apron.

Term	Definition
Reconciliation (Baggage-Passenger)	The mandatory process of matching every piece of checked baggage to a passenger who has boarded the aircraft before departure.
Tail Number	The unique registration number painted on an aircraft's tail, used to identify a specific airframe for operational and maintenance tracking.

End of Document

SkyHorizon Airways - Airline Policy & Operations Manual, Revision 4.2 This is a fictional document created for academic/educational purposes and does not represent any real airline.
